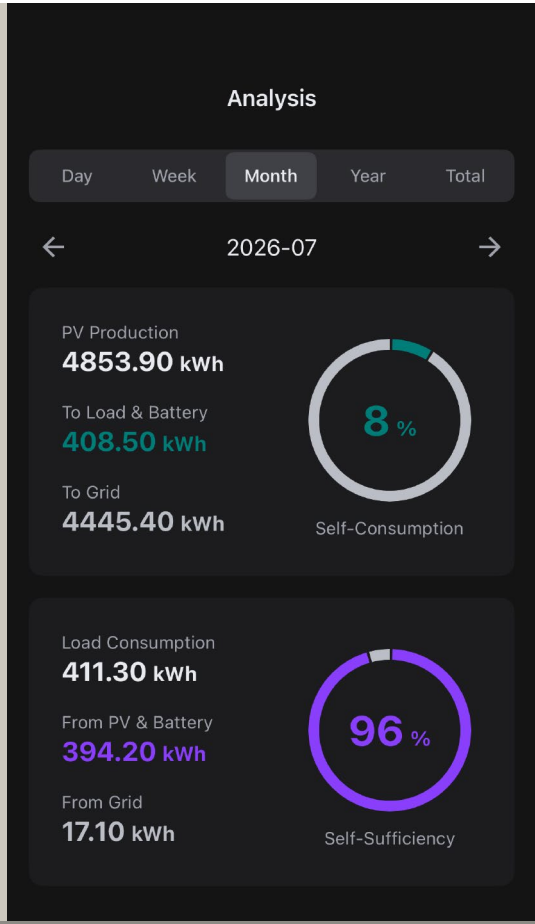
Built Wunderhaus Home Performance

Illustrative live performance data — Harbury, July 2026

96% self-sufficient • 4,445 kWh exported • ~£533 gross export income

Metric	July 2026 Result	Why it matters
Electricity generated	4,854 kWh	Almost 12× the home's monthly demand
Household consumption	411.3 kWh	Low monthly electricity demand
Supplied by PV + battery	394.2 kWh	Most demand met on site
Imported from grid	17.1 kWh	Minimal reliance on grid electricity
Exported to grid	4,445.4 kWh	Large surplus clean electricity
Export income	£533.45	Gross income at 12p/kWh

In July 2026, this built Wunderhaus home **generated almost 12 times its own electricity demand,** imported only **17.1 kWh** from the grid, and **exported 4,445.4 kWh** of surplus electricity — worth approximately **£533** at a 12p/kWh export tariff.



Live monthly performance data. Output and export income vary by season, orientation, occupancy and tariff. Export income shown is gross export value before any import costs or standing charges.
