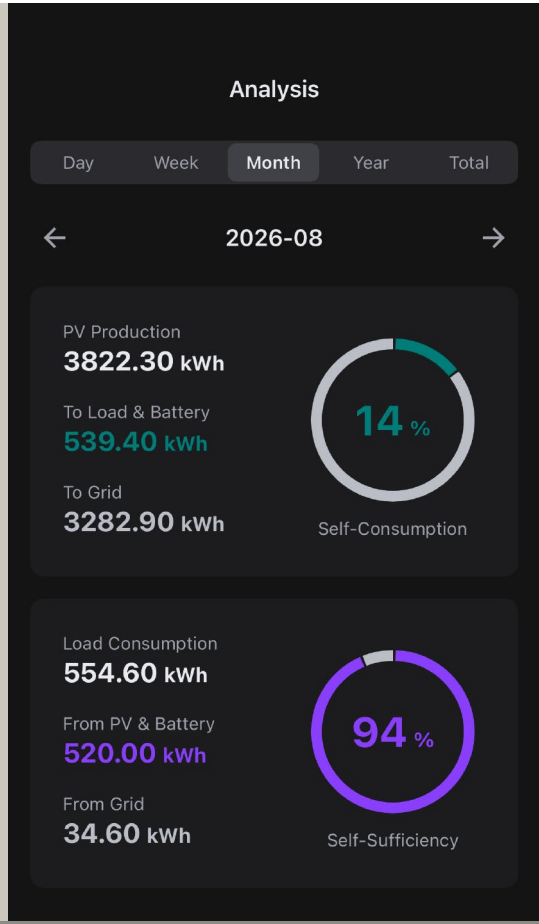
Built Wunderhaus Home Performance

Illustrative live performance data — Harbury, August 2026

94% self-sufficient • 3,283 kWh exported • ~£394 gross export income

Metric	August 2026	Why it matters
Electricity generated	3,822.3 kWh	Almost 7× the home's monthly demand
Household consumption	554.6 kWh	Moderate monthly electricity demand
Supplied by PV + battery	520 kWh	Most demand met on site
Imported from grid	34.6 kWh	Minimal reliance on grid electricity
Exported to grid	3282.9 kWh	Large surplus clean electricity
Export income	£393.95	Gross income at 12p/kWh

In August 2026, this built Wunderhaus home **generated almost 7 times its own electricity demand,** imported only **34.6 kWh** from the grid, and **exported 3,282.9 kWh** of surplus electricity — worth approximately **£394** at a 12p/kWh export tariff.



Live monthly performance data. Output and export income vary by season, orientation, occupancy and tariff. Export income shown is gross export value before any import costs or standing charges.
