Infinigate and Entrust Partner to Meet Critical Cybersecurity Needs in Poland

Wednesday 19 November, 2025

Warsaw, Poland – 19 November 2025 – The Infinigate Group, the leading technology platform and trusted advisor in Cybersecurity, Cloud & Network Infrastructure, today announced an agreement with Entrust, a leading provider of identity-centric security solutions. Through this collaboration, Infinigate will offer Entrust data security solutions to channel partners across Poland.

The demand for cybersecurity in Poland is rising, fueled by the digitization of businesses and government operations. As digital infrastructure expands, so does the need for advanced protection against increasingly sophisticated cyber threats. By offering Entrust data security solutions, Infinigate empowers channel partners in Poland with expert consultancy and support designed to help end customers protect critical data and help ensure compliance across diverse business environments.

Entrust data security solutions include Hardware Security Modules (HSMs), Public Key Infrastructure (PKI), Certificate Lifecycle Management (CLM), and Key and Secrets Management, unified under the Entrust Cryptographic Security Platform, which provides centralized management, automation, compliance management, and orchestration over the lifecycle of these foundational cryptographic assets.

Joanna Sadecka, Country Manager at Infinigate Poland, said: “Adding Entrust to our portfolio in Poland translates into a growth opportunity for us and our partners. Entrust’s innovative platform addresses very real and pressing needs that an increasing number of our business customers have today. It is a very relevant solution for our market.”

“We’re pleased to work with Infinigate to help organizations in Poland protect what matters most – their sensitive data,” said Steve Jackson, Channel Sales Director, Entrust. “With Infinigate’s deep cybersecurity expertise and local presence, businesses can confidently deploy our data security solutions like HSMs, PKI, CLM and key management to help meet compliance needs and defend against evolving threats.”
