SHS Products introduce Key-Link Railing and Infinity Railing systems that promise 'million-pound views'

SHS Products is proud to announce that the company has increased its range of products and is now able to offer Key-Link railings and Infinity topless railing systems to its services to clients.

The Infinity topless railing system is as safe as it is stylish, promising million-pound views thanks to the unique way the design eliminates upper and lower rails. The end result is a strong, stylish, and versatile railing system that has enhanced projects across the UK via specifiers everywhere.

Key-Link aluminium railings are just as attractive and durable in equal measure. Weather-resistant, thanks to their powder-coated finish, Key-Link railings are maintenance-free, adding sophistication and style to decking projects requiring a balustrade.

Both products are provided exclusively in the UK by SHS Products, which has previously collaborated on projects with Marks & Spencer, Selfridges, West Bromwich Albion Football Club, and other national clients.

"We're delighted to be creating and providing the UK with some of the most attractive aluminium railing systems on the market that don't sacrifice style for safety." comments an SHS Products spokesperson.

"Having such stylish products as part of our service allows us to work with all manner of creative companies and individuals that are looking for proven safety railings and solutions that seamlessly fit into the overall theme of their projects."

The two additions to SHS Products' portfolio complement the West Midlands firm's already comprehensive range of railing solutions which includes glass balustrade systems, frameless glass balustrades, wire rope infill systems, stainless steel balustrades, and more.

SHS Products is also able to manufacture bespoke railing systems for clients to give them the perfect safety solution for their projects, as well as provide them with components and complete systems.

-Ends-
