

# French ELO is now live on Customs Declarations UK.

Generate your mandatory Enveloppe Logistique Obligatoire directly on the platform — integrated with the French Customs Authority.

## **UK–France RoRo**

Mandatory for all road vehicle crossings between the UK and France.

## **Fully Integrated**

Connected directly with DGDDI, the French Customs Authority.

## **Free to Use**

Available free with fair usage for all customers.

# Every UK–France RoRo crossing needs one.

The **Enveloppe Logistique Obligatoire (ELO)** is a mandatory French customs requirement for all road vehicles crossing between the UK and France.

## Crossing Direction

Import or Export — declared for every movement.

## Truck Type

Loaded or Empty — captured at the point of generation.

## Linked MRNs

Safety & security declaration MRNs referenced directly.

## Shipment Flags

SPS goods, TIR/ATA, and fish products — all flagged correctly.

The ELO barcode must be presented at the French border. **No ELO — no crossing.**

# Operators were managing it on a separate system. Not anymore.

Before CDUK's ELO integration, generating a compliant ELO was a fragmented, error-prone process. Here's what changed:

## ✗ Before CDUK Integration

- Log into a separate French customs portal
- Re-enter MRN and crossing data manually
- Download the barcode and share it separately
- Risk of mismatches at the border

## ✓ After CDUK Integration

- Generate ELO entirely within CDUK
- Integrated directly with French Customs
- No re-entry of data — aligned throughout
- One platform. Zero friction.

# ELO references your ICS2 filing. We support that too.

French customs requires that an ELO references a valid safety & security declaration — specifically an **ICS2 Entry Summary Declaration** for EU-bound movements.

ENS Filed

ELO Generated

## End-to-End ICS2 Support

Customs Declarations UK supports ICS2 across **all transport modes** and **all filing types** — so both your ICS2 and your ELO are managed in one place.

## Aligned Data Throughout

Because ICS2 and ELO share the same data source within CDUK, there are **no gaps** and **no mismatches** — reducing border risk significantly.

GET STARTED TODAY

# ELO is free. Start today.

ELO is available **free with fair usage** for all existing and new Customs Declarations UK customers.
