It represents a **passion for creating a better world** where young people are not only **job seekers, but job creators too**.

And, with **millions more beneficiaries every year**, a new wave of practical, market-oriented education programmes globally represents a **new era in the sustainability, efficiency and innovation of schools around the world**.

The annual **Education That Pays For Itself** conference is a space for professionals to share their **insights, discuss and engage** with fellow delegates and participants on the **future of entrepreneurship, youth employability and innovative approaches to education in schools and communities**.

It's **time to invest in tomorrow's entrepreneurs** by sharing skills with a **community of leaders from around the globe**.
