### What is Water Soluble?

CBD HEALTH<sup>®</sup> liposomal technology provides superior absorption! Outperforming traditional delivery methods.

It's common knowledge that oil and water do not mix. It's also known that the human body is made up of approximately 90% water! CBD is an oil soluble and therefore has a very poor absorption rate through traditional administration methods.

The liposomal encapsulation delivers a higher percentage of CBD into the bloodstream. Not only does the liposomal method utilise CBD better, it is more effective and more affordable. Less CBD is required compared to traditional delivery routes.

CBD Oil Compound

MAXIMUM BIOAVAILABILITY  
**EASY 1ML TO 1MG DOSE**  
one - ml - equals - one - mg

It has never been easier to deliver an exact dose of CBD, using our oral applicator, we have developed this product to be exactly 1mg of CBD for every mL. Depending on the dose you choose, you can be assured you're delivering a consistent dose time and time again.
