OUR COMPANY

With over 15 year working in the energy sector, we are specialist in creating industrial projects software for the energy sector. Solutions built by engineers for engineers. To simplify the complex and drive cost savings and safety. Our clients are remarkably diverse: large and small, private and public, Owner Operators and EPC's. We help them grow, sustain and digitally transform: whatever it takes to embrace their future.

We work in partnership with each client on a journey of digitalization. Client needs, expectations and strategy provide the context for every project we carry out together.

Whatever their size, wherever our clients are, we are set up to deliver.

OUR CUSTOMERS

With offices in the USA, UK, Middle East and Australia we have an extensive portfolio of clients in the Oil and Gas sector.

We work with EPC's and Owner Operators on:

- Shutdowns & Turnarounds
- Brown Field Projects
- Green Field Projects
- Maintenance
- Operations

Industry 4.0 software and services that delivers higher levels of safety and productivity offshore and onshore

Delivering meaningful, simplified and accurate reporting regardless of your location

Connecting remote workforces with safe and secure mobile technology

Innovative solutions • Delivering results

OVERVIEW

MODS continues to develop high ROI solutions, built on the knowledge gained working with some of the world's most well-known companies in the Oil and Gas industry. Our technology and best-of-breed capabilities improve employee safety, reporting and risk management across your company.

MODS software is developed from the ground up to replace manual, paper-based and redundant software processes with a cost-effective automated solution for your projects, maintenance and operations of onshore and offshore oil and gas facilities. With MODS solutions, we work to give you total visibility and control, a single source of truth you can trust, that belongs to you.

- Applications giving complete project risk visibility and control with Intuitive and easy-to-use reports
- Software and Apps designed for end-user with easy access, easy navigation.
- Cloud-based solutions to improve data quality and drive optimization through 3D visualization
- Fast implementations built on standard configuration coupled with additional services to meet your company's unique needs

MODS SOLUTIONS

Its well documented that the majority of projects overrun, causing increased costs by as much as a staggering 80% of original value* and schedules have an average deviation of 29%.

The MODS Connect suite of modules and complimenting services Virtual Asset and Dimensional Control provide you with the tools to create a single source of truth to plan, schedule, execute and operate with confidence. On budget. On schedule.

MODS create a technology partnership with you that will accelerate your digitalization plans, making the complex, simple.

Benefits

- Clearer Accurate Reporting
- Less Administration
- Less Business Disruptions

"Digitalization is the use of digital technologies to change a business model and provide new revenue and value producing opportunities"

MODS Deliver Value to the Customer

MODS aim is to reshape the Oil and Gas industry with the deployment of digital solutions that simplify the complex. Delivering high return on investment and more secure safety records when building, expanding, maintaining and operating facilities.

Digital transformation is not a destination it is an enabler for business agility that leads to the next challenge — mastering continuous change.

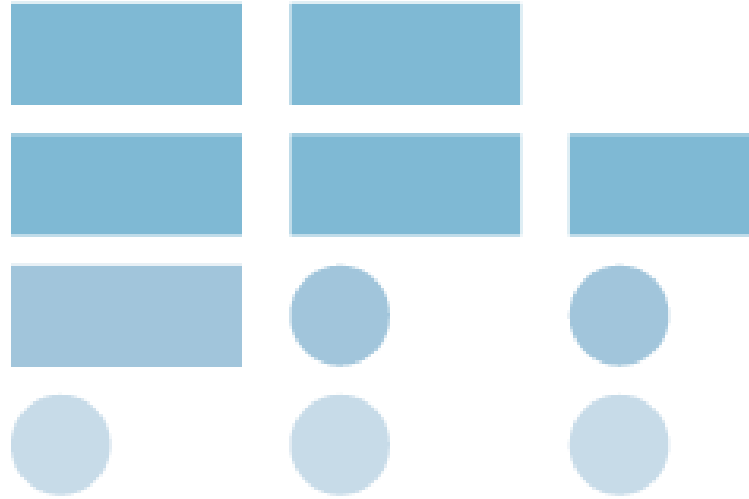

Waiting to execute a digital strategy only allows the gap between where you are now and where you need to be to widen
