# 100 Chances to Win a £4 Million Jackpot

**Tuesday 8 August, 2017**

The world's most famous progressive jackpot has been steadily building momentum over the last few months. MicroGaming's Mega Moolah has an unprecedented record for making millionaires and continues to capture the imagination of players around the world. It's main jackpot game has already paid out over £35 million in 2017, and it's current prize pot has soared above £4 million. History suggests that the huge windfall could drop soon, and Captain Cook's Casino are giving you the perfect excuse to try your luck.

## The Jackpot that Pays Out in Millions

It's more than two months since somebody last scooped the Mega Moolah Mega Jackpot. The player in question took home a cool £1.8 million from a £5 stake. It may sound ridiculous, but that's fairly paltry figure compared to the game's average payout, which sits in excess of £6 million. In fact, the last three winners have all take home less than £2 million - a life changing amount perhaps, but considerably lower that the eye-watering amounts that some players have taken home.

## Record £13.2 Million Win from a 25p Stake

The world record for the biggest single payout from an online slot is a coveted landmark. Mega Moolah has tended to compete with NetEnt's Mega Fortune for the feat, and has held top spot since former British soldier John Heywood scooped £13.2 million (at the time more than €17 million) from a £0.25 stake.

Mr Heywood's win captured headlines around, not only because of its sheer size, but because the lucky winner had stake so little during a short casino session lasting minutes. The record has stood for more 22 months now, although the record mobile win has fallen a number of times during that period.

## Play for £4 Million on Mega Moolah

The current Mega Moolah jackpot may not have reached those lofty heights yet, but it's certainly a life changer. In two months, it's grown to £4 million and beyond, and it continues to scale higher. If it fell today, it would represent the game's biggest payout since April when a player pocketed a whopping £8 million when raising that record for the biggest mobile jackpot win. One online casino in particular is always keen to give you the chance to play for the most renowned jackpot in the industry too.

## Deposit £5 For 100 Chances to Win the Jackpot

Indeed, Captain Cook's Casino is very proud of both its welcome bonus and propensity to millionaire making. The trailblazing online casino introduced a remarkable, unique welcome bonus earlier this year that promises players 100 chances to win the Mega Moolah jackpot for a £5 deposit - and there are no catches.

The promotion is available to new players making their first deposit. It's an unprecedented offer that gives players 100 real money free spins that they can use on any game, including Mega Moolah and other MicroGaming jackpots. The deal has already had a very tangible impact too. A British player won millions using the bonus back in March, and he's not the only one either.

## When Will the Mega Moolah Jackpot Next Drop?

Nobody can answer this question definitively of course, but we can look at historical precedents. The statistics tell us that somebody wins the main Mega Moolah jackpot once every 33 days average. Its been more than 60 days since it last fell, so you could reasonably expect it to tumble soon.

Of course, as the days tick by, the jackpot continues to grow. That's how progressive jackpot slots work. A percentage of ever wager made worldwide goes towards the prize pot. It may not have reached the heights of its record breaking heyday, but summer is traditionally the quietest time for online casino play. £4 million could still buy you a decent enough summer holiday, and somebody has to win the big prize.
