

37-Year-Old U.S. Customs Misunderstanding Continues to Hinder the Science of Keppe and Pacheco from Benefitting the People

Wednesday 17 December, 2025

London, Dec. 17, 2025 – Dr. Norberto da Rocha Keppe (Austrian/Brazilian) and Dr. Claudia Bernhardt de Souza Pacheco (Italian/Brazilian), two internationally recognized scientists whose work spans psychoanalysis, education, and innovative physics, continue to face significant barriers to the worldwide dissemination of their work due to an active U.S. arrest warrant stemming from a misunderstanding at JFK Airport in New York back in 1988. The scientists spent 3½ days in prison before receiving a hearing, where, despite no concrete evidence against them for the accusation of customs violations, Department of Justice prosecutors convinced the judge to impose punishingly high bail amounts, house arrest and electronic bracelets. Keppe and Pacheco fled to France in response to this unjust and excessive treatment, triggering the arrest warrant, a mere technicality hanging over a 37-year-old case (the U.S. Government vs. Keppe and Pacheco), which the Department of Justice itself has admitted they have no intention of investigating further.

The work of Dr. Keppe (now 98) and Dr. Pacheco (77), which has been substantially impeded by this residual arrest warrant, is highly relevant to contemporary global challenges:

- **Analytical Trilogy: A New Frontier in Psychoanalysis**

- These leading psychoanalysts developed Analytical Trilogy, a groundbreaking school of thought that unifies theology, philosophy, and science. This highly effective method, grounded in the study of the science of Energetics, has transformed the lives of thousands of clients worldwide with its integral approach to mental, physical, and social disorders.
- They are also highly accomplished therapists with documented results in psycho-somatic healing, helping many clients achieve recovery from diseases without medication.

- **Prolific Authorship and Global Reach**

- Both are prominent authors with numerous books published and translated into many different languages, making their profound insights accessible to a diverse international readership.

- **The Keppe Motor: A Sustainable Energy Innovation**

- The Keppe Motor, patented in many countries including the U.S., has received accolades and awards worldwide for its superior energy efficiency and technological innovation. Based on Dr. Norberto Keppe's New Physics, a continuation of Nikola Tesla's work, the Keppe Motor is a resonant current motor (RC) poised to offer humanity a path toward healthier, more sustainable energy alternatives and away from the pollution and limitations of conventional electricity.

- **Educational Leadership and Humanitarian Actions**

- Dr. Claudia Pacheco is the founder of a boutique college in Brazil, which has received the highest educational rating from Brazil's Ministry of Education, demonstrating her commitment to academic excellence and innovative pedagogy.
- She also founded and presides over the **STOP the Destruction of the World Association**, established in Paris in 1992. This internationally active organization uniquely applies Keppe's science to address the psychosocial causes of human and planetary destruction, advancing a deeper understanding of human pathology in support

of mental, environmental, and social health.

- **The Discovery of Inversion: A Master Key for Humanity**

- Dr. Keppe's seminal discovery of the psycho-social mechanism of Inversion in 1977 offers a master key to understanding and resolving the myriad multi-disciplinary problems facing humanity for centuries, and especially here in the 21st century, and provides a profound framework for personal, societal, and environmental transformation.

Final Conflict Resolution between U.S. Government and Keppe and Pacheco

The Inter-American Commission of the Lusophone Association for Human Rights, representing professors, psychoanalysts, scientists, researchers, students, and clients of the Keppe and Pacheco Association, together with its attorneys, supporters, and colleagues, is calling on the U.S. Government to remove the arrest warrants for the two scientists, who have been proven innocent, so the science of the Analytical Trilogy may reach more people worldwide with effective and urgently needed solutions.
