Abingdon Bonfire & Fireworks 2025: The UK's Biggest Fireworks Show Returns with Unmatched Scale and Spectacle

Abingdon, Oxfordshire — The UK's most spectacular night of light, fire and family fun is back this November, as **Abingdon Bonfire & Fireworks 2025** returns to **Abingdon Airfield** on **Saturday 15th November** with a show-stopping lineup of attractions — headlined by the **largest fireworks, light and laser display in the UK**.

This year's breathtaking display is produced by **Oxfordshire-based Illusion Fireworks Ltd**, an **international award-winning display team** known for delivering cutting-edge pyrotechnic experiences at major events around the world. The show features a **270° wrap-around fireworks, light and laser experience**, fully choreographed to music, surrounding the crowd with colour, power and precision like never before.

Set apart by its scale and spectacle, the event also features an **extremely large bonfire**, live entertainment, and the **South of England's biggest fairground** — with **30+ large thrill rides**, plus traditional fairground classics, childrens rides, side stalls and carnival games.

New for 2025 is an earlier, family-friendly **K-pop Demon Hunters Singalong & Light Show**, designed specifically for younger visitors. Featuring a megamix of songs from the hit Netflix series and stunning **low-noise fireworks**, it's the perfect warm-up experience before the full-scale main display.

Returning favourites include the crowd-thrilling **Oklahoma Willy Jet Engine Van**, which will roar in front of the audience, and **new for this year**, the introduction of **monster truck rides**, giving attendees the chance to experience these powerful machines up close. Guests will also be entertained throughout the evening by a variety of **roaming performers and live entertainment including guest DJ Fake Boy Slim!**

As ever, the night will conclude with Abingdon's **famous explosive fireball finale** — a signature moment that leaves the crowd on a high.

In response to public feedback from previous years, organisers have also **invested in an unprecedented traffic management scheme**, in partnership with **Buko Traffic & Safety**. Supported by a Temporary Traffic Regulation Order from Oxfordshire County Council, the plan includes a dedicated one-way traffic system, new entrance gates, additional stewarded car parks and an ANPR-controlled parking system to ensure a safe and smooth experience for all.

"This year is a turning point for the event," said a spokesperson for Abingdon Bonfire & Fireworks.

"We've invested heavily in both the entertainment and the traffic infrastructure. From the UK's biggest fireworks and light show to a completely transformed travel experience, Abingdon is setting a new standard for large-scale events."
