Ace Sheds Provide An Ideal Shed For London Usage

Friday 22 November, 2013

Ace Sheds provide sheds for all applications and sites and can supply the needs of just about everyone except the person who does like wood. Otherwise they have a shed for nearly everyone and if there is any question Ace Sheds will make one to order from the customers own design. London might seem a special case with the small gardens and limited space but the bulk of Greater London has the same needs as the rest of the South of England. There are some excellent sheds which fit the Londoners needs and Ace Sheds has designed their sheds for a range of different requirements depending on uses required by the user concerned.

One of Ace Sheds most popular designs is the Berkshire Pent Shed which has a sloping roof with the front on the high side of the roof. The front consists of a central front door with 2 excellent windows equidistant either side of the front door. Each window is built with 4 square panes using plastic safety glass although 4 mm toughened glass is an option. The sides are all constructed of high quality Red Wood tongued and grooved cladding which has all been {pressure treated. The sides are strengthened by an excellent timber frame with diagonal supports to stop twisting. Ace Sheds have constructed the floor of 12 mm tongued and grooved boards and the whole floor is supported above the ground by sturdy wooden runners which have been fully pressure treated like the walls. The roof has been constructed the same as the floor and pressure treated in the same manner and the roof has been strengthened by main and supporting timbers. The whole roof is protected against the weather by a good quality mineral felt.

Ace Sheds are delighted with this shed as it supports a wide range of activities whilst having an excellent outward appearance which will look good in any garden. This shed can be made secure by installation of good locks, Ace Sheds have given the shed a sturdy door and frame and a good hasp and lock will complete the installation. Ace Sheds can also supply a burglar alarm to attract attention or it can be linked to phone a set number and rouse the householder.

The Berkshire Pent Shed is ideal for storage for garden furniture such as folding chairs as well as mowers and garden tools. It is also possible to store the bicycle or the children's toys. Ace Sheds are pleased to be able to supply this shed in a number of different sizes up to a large 12 feet x 8 feet and the size can be very important. This lovely shed can be used as a workroom and a larger model is ideal to have storage in one part and a work bench and space in another area. This is ideal in that it takes the dirty jobs out of the house and into a proper working space which is nice and dry.

Ace Sheds are very proud of their full range of sheds and would be only too pleased to discuss any queries by email or phone.
