Newburyport (MA, USA) – AdvancedDx Biological Laboratories USA Inc., an affiliate of ABL Diagnostics (FR001400AHX6 – ABLD, the “Company”), a Euronext-listed company that develops molecular biology assays and software for microbiology laboratories, is pleased to announce today the execution of a non-exclusive distribution agreement to confer to Medline Industries, LP (www.medline.com) the rights to promote and commercialize in the United States the ABLD Next Generation Sequencing (“NGS”) solutions including new high throughput library preparation kits.

The NGS market was estimated at USD 1.42 billion in 2022 and is projected to expand at a compound annual growth rate (CAGR) of 13.16% from 2023 to 2030. The ABLD NGS kits bring efficiency to laboratories and centers involved in any NGS sequencing by offering customers a scalable, high-performance library of preparation solutions that decrease workflow time compared to other methodologies.

Engineered for efficiency, the kits come with optimal performance in terms of turnaround time (~75 min for the entire library preparation workflow), robustness (high-quality DNA libraries with high yields, dual indexing) and versatility. Indeed, the reagents are compatible with all Illumina NGS systems (NextSeq, MiSeq, MiniSeq, iSeq-100...) and streamline the process of preparing and pooling libraries for any species for a broad spectrum of samples.

“We are excited to begin distributing the ABL Diagnostics kits in the U.S., which will enable Medline to continue expanding our portfolio of offerings and bring efficiency to laboratories and genomic centers involved in NGS sequencing,” said **Nicole Krpan, Medline Laboratories Division General Manager**.

“These NGS Kits help eliminate bottlenecks related to cost, time, and labor, making them one of the most cost-effective high-throughput library preparation solutions on the market. We are glad to develop this activity in the U.S. through Medline,” added **Dimitri Gonzalez, Head of Diagnostics at ABL Diagnostics**.

The detailed terms of the agreement have not been disclosed.

ABOUT ADVANCEDDX BIOLOGICAL LABORATORIES USA INC & ABL DIAGNOSTICS

ADVANCEDDX BIOLOGICAL LABORATORIES USA INC is an affiliate of ABL DIAGNOSTICS S.A. (ABLD), a worldwide leading international company offering innovative and proprietary molecular biology assays applied for genotyping through DNA sequencing – DeepChek®.

ABL Diagnostics, based in Woippy, is a public company listed in compartment B of Euronext’s regulated market in Paris (Euronext: ABLD – ISIN: FR001400AHX6).

These molecular biology products are generating recurring revenues and cover one of the largest portfolio of microbiology applications,

ABL Diagnostics commercializes its entire line of products on a worldwide basis through its own sales team and through a network of exclusive distributors active on all continents. ABL Diagnostics clients are academic laboratories, private laboratories and researchers willing to implement innovative and robust microbiology contents in constant expansion.

The persons must inquire about the registration status of the ABL’s products to comply with local regulations.

Only Research Use Only (RUO) tests are available for sale in the USA as listed on the FDA website. For further information, please visit www.abldiagnostics.com

ABOUT MEDLINE INDUSTRIES, LP

Medline is a healthcare company – a medical supply manufacturer, distributor, and solutions provider focused on improving the overall operating performance of healthcare. Partnering across the continuum of care, Medline helps providers to activate the clinical and supply chain resources needed to deliver their best care. With the agility to solve problems quickly and the scale to partner with providers for their sustained success, Medline is able to invest in its customers for the future and rapidly respond to a dynamically changing market with customized solutions. Headquartered in Northfield, Ill., Medline has 38,000+ employees worldwide and operates in over 110 countries and territories. Learn more at www.medline.com.

FORWARD LOOKING STATEMENT

This press release contains implicitly or explicitly certain forward-looking statements concerning ABL Diagnostics and its business. Such forward-looking statements are based on assumptions that ABL Diagnostics considers to be reasonable. However, there can be no assurance that such forward-looking statements will be verified, which statements are subject to numerous risks, including the risks set forth in the “Risk Factors” section of the universal registration document filed with the AMF on July 12, 2022 under number 22-296, available on the web site of ABL Diagnostics (www.abldiagnostics.com) and to the development of economic conditions, financial markets and the markets in which ABL Diagnostics operates. The forward-looking statements contained in this press release are also subject to risks not yet known to ABL Diagnostics or not currently considered material by ABL Diagnostics. The occurrence of all or part of such risks could cause actual results, financial conditions, performance or achievements of ABL Diagnostics to be materially different from such forward-looking statements.

This press release and the information contained herein do not constitute and should not be construed as an offer or an invitation to sell or subscribe, or the solicitation of any order or invitation to purchase or subscribe for ABL Diagnostics shares in any country. The distribution of this press release in certain countries may be a breach of applicable laws. The persons in possession of this press release must inquire about any local restrictions and comply with these restrictions.
