AESIN launch unique UK Automotive Electronics Capability Directory

Thursday 26 May, 2016

AESIN is delighted to announce the launch of unique UK Automotive Electronics Capability Directory; produced in response to Industry and Stakeholder community needs.

It is with a sense of excitement that we launch this new Capability Directory (in web form) and AESIN is proud to be undertaking the project on behalf of members and stakeholder community alike. A published version of the directory is planned for release at the CENEX LCV2016 Conference taking place on September 14th-15th, Millbrook.

The specialised directory is set to cover all aspects of Automotive Electronics such as driver instrumentation, chassis control and powertrain electronics.

The directory is open to anyone operating within the Automotive Industry in the UK. Listings are FREE and opportunities for higher visibility are also available.

AESIN Chairman Alan Banks said "*The AESIN Automotive Capability Directory will be a high value resource for the industry, helping locate the right suppliers to help speed up the rate of innovation and help promote / showcase the wealth of excellent capability the UK has already established. The rapid growth of the sector and in particular electronic systems content provides an exciting opportunity for companies to engage and I would urge you to help us build a valuable UK Automotive Electronics Capability Directory*".

Check eligibility, find out more and participate by visiting the AESIN website.

AESIN (operated by NMI), provides an excellent basis for collaboration across electronic and automotive domains with further workstreams on Electric Powertrain, Security and ADAS (Advanced Driver Assistance Systems).

For more information see www.aesin.org

AESIN is operated by NMI, the non-profit trade association for electronic systems, microelectronics and semiconductors: www.nmi.org.uk
