Alma UK's cutting-edge MIS replaces outdated systems that are no longer equipped to meet the real demands of modern education.

London, UK - Alma Technologies, the leading provider of cloud-based student data management systems, announces the launch of its UK version of the platform, Alma UK. This exciting development tailors Alma's innovative and user-friendly technology to schools and multi-academy trusts in the United Kingdom, streamlining their administrative processes, improving communication and collaboration, while enhancing the overall student experience.

Although Alma's future-ready student information system platform was previously available in the UK (and worldwide), Alma UK has been adapted to address specific needs of UK schools and MATs. This includes readying Alma's MIS platform for DfE reporting as well as lexicon revisions unique to the UK.

Alma UK offers a comprehensive set of features, including student registration, enrolment, fee management, scheduling, gradebook, and more. The platform is designed to provide a seamless and intuitive user experience, with a focus on simplicity and accessibility and its cloud-based infrastructure means that student data can be safely accessed from anywhere, anytime, eliminating any restrictions of on-premises access. Alma UK also offers the industry's most robust security measures to ensure the protection of student data and privacy.

"We are thrilled to bring Alma's groundbreaking technology to schools and MATs in the United Kingdom," said Andrew Herman, CEO and Co-founder of Alma. "Our mission is to empower educators and administrators with the tools they need to support students and improve educational outcomes. Alma UK is just the latest step in our commitment to delivering this mission on a global scale."

Alma UK's user-friendly interface makes it easy for teachers, administrators, and students to access information and collaborate. Users also have access to an expansive range of integrations with 3rd party software, such as Google for Education apps – and the MIS contains built-in tools to greatly ease transition away from outdated, cumbersome systems.

Alma UK has already received significant interest from schools and MATs across the United Kingdom, and looks forward to working with new partners to help them transform their administrative processes and improve student success.
