

Anritsu Service Assurance announces deployment of Anritsu Enterprise Assurance on Nokia DAC private wireless network

Thursday 9 February, 2023

- Anritsu Service Assurance delivers dedicated network service assurance on a private network.
- Enhanced visibility of services and device experience on private networks provides operations teams with insights into enterprise-critical services
- The insights and data gathered will be presented at the Anritsu booth (Hall 5 Stand 5D41) at Mobile World Congress Barcelona

Copenhagen, Denmark -- February 9th 2023 --

Anritsu A/S today announced a trial deployment of its network service assurance on a Nokia private network. The trial, in progress at the Atsugi 5G Lab in Japan, explores the use cases for enterprise customers, particularly those with demanding applications and mobility requirements.

The Anritsu Enterprise Assurance solution is running on the Nokia Digital Automation Cloud (DAC). Nokia DAC is a reliable leading platform for private wireless connectivity and edge computing. The Anritsu Enterprise Assurance solution provides data acquisition and mediation on the Nokia platform. The solution also provides reporting, troubleshooting, analytics, and anomaly detection on private networks, giving operations teams the same confidence in their network that CSPs have.

"Private networks is a rapidly growing and developing industry. The implementation of network assurance on top of the existing performance metrics provided as part of the P5G network can provide enterprise customers with visibility across services such as enterprise-critical, mobility-sensitive applications. Our Service Assurance capabilities will be critical for the most demanding enterprises with the most demanding use cases." says Ralf Idling, CEO of Anritsu Service Assurance.

A demo of the Anritsu Enterprise Assurance solution will be available at Mobile World Congress Barcelona, February 27th – March 2nd.

About Anritsu Service Assurance

At Anritsu Service Assurance, we deliver next-evolution autonomous networks with customer, service, and network assurance. Anritsu Service Assurance specializes in networks and services with innovative AI to provide an optimal experience for our clients and their subscribers. We help all teams run efficiently, quickly, and with complete visibility across all technologies and services.

We make it easier to find and act on subscriber and network issues. We have created end-to-end virtualized solutions to support operators worldwide on their cloud-native journey
