# Aquataps Launches Aquatap Ultimo: A Complete 6-in-1 Boiling, Chilled & Sparkling Water Tap System

**Tuesday 24 March, 2026**

UK-based specialist in **boiling water taps**, Aquataps, has announced the launch of the Aquatap Ultimo — a new **6-in-1 kitchen water system** combining boiling, chilled, and sparkling water in a single tap.

The Aquatap Ultimo delivers six functions from one fixture: **filtered boiling water (up to 98°C), filtered chilled sparkling water, filtered chilled still water, filtered ambient drinking water, plus standard hot and cold**. Designed as a complete replacement for a kettle, filter jug, and sparkling water appliance, the system simplifies kitchen worktops while providing on-demand filtered water.

Available from £1,249.99 inc. VAT, the Ultimo is aimed at homeowners and kitchen designers seeking a space-efficient, all-in-one solution.

## Digital Control with LED Function Indicators

The tap features a precision knurled control dial with integrated LED illumination, providing clear visual feedback for each function: white (standby), green (filtered ambient), blue (chilled), light blue (sparkling), and red (boiling).

A built-in 3-second press-and-hold safety mechanism controls boiling water delivery, while a cool-touch spout enhances everyday usability.

## Integrated Boiler & Chiller System

The under-sink unit combines both boiler and chiller in a single compact appliance (372 × 242 × 422 mm), helping to minimise cabinet space usage.

- 2.4-litre boiler delivering water up to 98°C
- Approximate reheat time: 8 minutes
- 2.2-litre chilled reservoir maintaining 3–10°C
- Sparkling water generated on demand via external CO? cylinder

A nano-phosphate filtration system reduces chlorine, lead, arsenic, iron, and manganese in the water supply.

## Availability & Warranty

The Aquatap Ultimo is available in **Polished Chrome, Matt Black, Brushed Nickel, and Brushed Brass**.

- 5-year tap warranty
- 2-year warranty on boiler and chiller system
- Free next-day delivery across UK mainland
