Asset Guardian Solutions Appoints New Technical Consultant As It Keeps Up With Global Demand

Wednesday 4 November, 2020

Edinburgh, Scotland – 4 November 2020 –

Asset Guardian Solutions Limited (**AGSL**) which specialises in managing and protecting process critical software across industry sectors, announced that it has appointed Sam Cook to the position of Technical Consultant.

This decision is part of AGSL's plans to expand its global operations as the leading solutions provider in asset protection for the industrial automation sector.

In his new role as Technical Consultant, Sam is responsible for assisting the Technical Team in developing the Asset Guardian software, from designing and coding to testing. He will also assist the AGSL customer support team which is responsible for liaising with AGSL's global customer base to create budget proposals, install software and provide bespoke solutions.

"We are very pleased to have brought in somebody with Sam's qualifications, but we were also very impressed with his desire to continue learning. We are confident he will start contributing from day one" said Iain Rennie, Product Manager for Asset Guardian Solutions Limited. "AGSL is continually looking to grow and develop and to expand and improve both our product and the service we give our customers. An expanding technical team, where we can bring in highly qualified, bright individuals is key to that philosophy."

Originally from Edinburgh, Scotland, Sam holds a First Class BSc (Hons) Degree in Computer Science. He is also recognised by The British Computer Society and is a member of The Chartered Institute for IT.

About Asset Guardian Solutions Limited

Established in 2004, AGSL is dedicated to protecting the integrity of Industrial Automation and Control Systems (**IACS**) software. The extensive functionality of Asset Guardian is summarised into three categories: Compliance Management, Configuration Change Management and Disaster Recovery, with additional modules specifically for Obsolescence and Cyber Security Management.

The Asset Guardian solution allows users to comply with both ISO and IEC standards, government directives, and industry best practices in relation to the management and control of their industrial control systems.

Substantial Global Growth

Following 16 years of continuous growth, Asset Guardian has grown into an "integrated solution", developed by control and automation engineers for control and automation engineers. It has since become the leading partner of choice for many Global Operators around the world when it comes to protecting process control software assets. AGSL successfully serves customers in Africa, Asia, East Asia, Australia, Europe, the Middle East, New Zealand, and the United States of America.
