Author responsive HTML5 mobile learning content with the new Luminosity Create toolset from CM Group

Wednesday 2 October, 2013

Luminosity Create enables organisations to author responsive HTML5 learning content, including courses, reference content, assessments and mobile surveys. The easy to use tool is available as an additional element to the Luminosity Motion mobile learning platform. Organisations of all sizes can now create, manage and distribute the materials to support their learners, wherever they are and whenever they need it.

CM Group is one of the UK's largest providers of bespoke eLearning courseware and complete end-to-end online and mobile learning solutions. The company is the country's leading innovator in the field of eLearning and mobile learning and provides the new Luminosity Create responsive authoring toolset, an optional add-on to CM Group's groundbreaking Luminosity Motion mobile learning platform.

Luminosity Create enables organisations to self-author responsive HTML5 based mobile learning content. The content produced from Luminosity Create detects the size and orientation of a mobile device, smartphone or tablet, and automatically adapts its layout to fit the available screen size. CM Group already uses the new toolset itself to author content for its corporate clients, now those clients have the option of authoring their own responsive HTML5 content.

CM Group's BYOD range of Luminosity Mentor learning and corporate communications Apps completes the range of products which together provide clients with a complete and fully integrated end-to-end mobile learning solution which is secure, flexible, scalable and proven in major international implementations.

Alex Mackman, Technical Director of CM Group said, "Today's learners expect the very best in terms of user experience. The responsive nature of the content produced by Luminosity Create is essential for delivering quality learning content to smartphone and tablet devices in a way that delivers a beautiful user experience."

Find out more about CM Group's responsive authoring solution and mobile learning solution.

About CM Group

CM Group specialises in the design and creation of advanced learning solutions for large international organisations. We offer comprehensive educational and technical consulting services centred around the use of technology to achieve great learning outcomes. Using Luminosity Studio, our advanced collaborative, rapid authoring software, we are the largest creator of bespoke HTML5 based eLearning courses in the UK. Our proven, end-to-end mobile learning solutions include responsive HTML5 content for tablet and smartphone consumption, cloud based hosting and delivery via the Luminosity Motion mobile learning platform, and the Luminosity Mentor range of BYOD Apps for offline consumption and tracking. Our clients include Microsoft, RBS, Virgin Trains, NHS, Three, MOD, BAE and many more leading organisations.

With offices in the UK and USA, CM Group is ideally placed to help clients with the full range of business and technical issues they face in harnessing the latest technologies to improve business performance through increased staff effectiveness.
