Award Winning HR Software Platform, Complygate, to Launch New Version 1.3 on May 14, 2020

Thursday 14 May, 2020

The UK, May 14, 2020: Complygate, a UK-based award winning HR software and Tier 2 Sponsor compliance platform, known as the only Immigration Compliance tool commercially available to SMEs in the UK, this week announced on May 14, 2020, they will be launching a new version of their software tool, known as Version 1.3.

The newer HR software release will include improved UI, bug fixes, and a mobile app for iOS and Android devices. Additionally, for employee self-service, Complygate is launching a new website with a dedicated help section, statutory holiday entitlement calculators, and plenty of freebies.

“We are always working to make the process of HR as seamless and intelligence as possible, embedding artificial intelligence into our software tools and solutions,” said Mr. Rajiv Ranjan, CEO of Complygate. “Our software helps clients reduce complexity in admin jobs through automation, reduce time spent on projects through user friendly workflows, and leverage the advantages of cutting edge technology, available at our fingertips. That’s why we are so excited to be announcing this update in the coming week.”

Following May 2020’s update, Complygate stated they are planning for an August 2020 update with AI-powered ID verification for passport and driver’s licenses for the EU, EEA, Canada, India, Pakistan, Bangladesh, and Australia. This new system will be able to verify whether the document has been digitally altered or not. Lastly, this new feature will be included in the subscription price.

Before the close of 2020, Complygate also stated they are preparing for a November 2020 update to the current system, enabling them to offer new payroll features that will be free for existing customers.

“We are encouraging those considering our software to jump onboard at this time so they can benefit from our free, future updates,” said Ranjan. “Our agile team is always working to create the most beneficial HR software tool possible today, which is why we want as many SMEs as possible to consider the time, money, and frustration saved with this kind of automated solution.”

Complygate’s new website platform makes use of minimalist graphics, interactive features, and easy-to-follow page layouts, like the features section that covers recruitment, timesheets, leave, employee self-service, onboarding, expense, Tier 2 sponsor compliance, and analytics. The website will also include more information about Complygate’s services that assist infrastructure, email notifications, automation tools, simplistic dashboards, deadline reminders, and lastly, drag and drop functionalities for creating multiple folders at once.

Complygate clients have stated some of the biggest benefits of working with the software includes: the creation of a positive work culture, easy decision making based on data, cost reduction through automation, agile usage of technology, simplification of often complex HR processes, and total digital transformation from the bottom up.

Complygate is on a mission to help SMEs everywhere, especially as they emerge from the COVID-19 shutdown.
