Bar Amigos ® innovative champagne and sparkling wine bottle pressure stopper now back in stock

Wednesday 13 April, 2016

The Bar Amigos ® revolutionary pressure bottle stopper preserves the taste and flavour of your favourite bubbly resulting in you no longer having to pour that expensive bottle of champagne or sparkling wine down the sink if you do not drink it in one sitting. Designed to fit most champagne and sparkling wine bottles, the individual stoppers in a range of colours are now back in stock, having sold out three times previously.In addition, a triple pack is now available which has been subject to the same stringent quality control and testing measures.

Its innovative technology results in the Bar Amigo's stopper providing not only a better taste option but its handy date reminder switch ensures you know when you stored your drink.

Colin Betteridge, Director and owner of Bar Amigos ®, a CKB Ltd ® group company brand, said “this stopper is different to other stoppers and bungs on the market as it pumps air into the bottle which gives far better results than non-pressured stoppers. The lock in the pressure pump system is designed to keep the champagne bubbles inside to preserve the taste. Only the Bar Amigos ® pressure stopper has the patented technology to enable your party to pump! This product has also gone down well with restaurant and bar owners as it enables champagne to be sold by the glass."

The stoppers come with a 3-year warranty and are simple to use and store. Simply place the stopper on the bottle and close the metal wing locks to secure. Once locked in place, push the button down several times to pump air into the bottle until the button is stiff. Your bubbly is now sealed with the correct amount of air pressure. To release simply place your hand over the cap and loosen the wing locks, taking care due to any air pressure build up.
