BBC Introducing artist premieres music video featuring NASA footage

Friday 28 May, 2021

BBC Introducing artist Lyna Galliara has premiered a music video featuring footage from The NASA Goddard Space Flight Center.

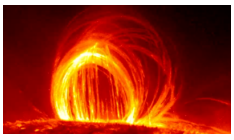

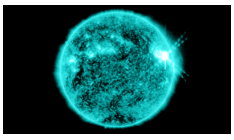

Regarding creation of the track and music video the music producer and video editor said:

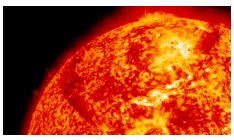

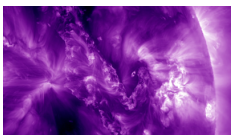

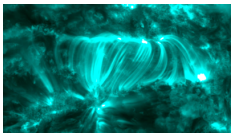

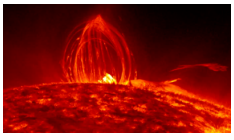

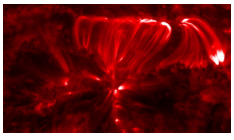

"I woke up with the melody and lyrics for 'Beautiful Star' in my head. I'd watched some stunning footage of The Sun - captured by The NASA Goddard Space Flight Center - a few days prior. Given the star-based lyrics of 'Beautiful Star', I thought the track presented an opportunity to make a music video that featured some of this footage. Although I think of myself first and foremost a music producer, I've increasingly come to enjoy editing music videos together for my tracks. Making the video for this track was no exception. I felt honoured to be able to work with footage from The NASA Goddard Space Flight Center - footage that's the result of the height of human ingenuity and passion".

Lyna's track 'Beautiful Star' is now free to download from her SoundCloud.
