

Beehive News: Promoting Journalistic Excellence with a Cutting-Edge, AI-Powered News Assessment Platform

Wednesday 7 February, 2024

In today's fast-paced digital world, the quest for credible, comprehensive, and unbiased information is more critical than ever. Beehive News introduces a truly revolutionary solution — the first large-scale news assessment platform in the world, dedicated to enhancing media transparency, recognising journalistic excellence at the article-level, and restoring media credibility. Our goal is to empower journalists, engage readers, and enrich the media ecosystem by providing a tool that aids in the discovery of reliable news stories amidst the vast array of available content. Consequently, we aim to redirect an audience that increasingly relies on social media for information back to traditional media outlets.

Beehive News leverages state-of-the-art AI technology to meticulously assess news content, setting new benchmarks in accuracy and reliability. This innovative platform stands at the forefront of the fight against misinformation, serving as a beacon of reliability in an increasingly convoluted information environment.

Core Offerings of Beehive News:

- **Global & Objective Assessment:** Using a combination of robust AI-powered algorithms, Beehive News scrutinises thousands of daily news articles from the UK and around the world with a comprehensive set of objective criteria, providing diverse viewpoints and ensuring adherence to the highest journalistic standards
- **Misinformation Counteraction:** Positioned as a pivotal tool in combating misinformation, Beehive News promotes reputable sources and well-crafted news stories, making it quicker and easier for news consumers and professionals to identify and access reliable information in real time
- **Recognition of Journalistic Excellence:** The platform not only safeguards against substandard content but also spotlights and elevates publications and journalists when they perform well, driving traffic and engagement to commendable sources through direct links to content
- **Seamless User Experience:** Beehive News provides a seamless and intuitive platform where readers can effortlessly discover and engage with credible, top-rated news content, mimicking the user experience in social media platforms but without all the noise
- **A Space for Independent but Responsible Voices:** Beehive News also partners with top university newspapers, including publications from the universities of Oxford, Warwick and Bath, providing a platform for earnest, independent and purpose-driven voices
- **A Risk-Free Addition to the Industry:** In a survey involving nearly 600 UK readers, 71% expressed that they view Beehive exclusively as an additional tool and would definitely not stop using their trusted publications' apps as their primary source of information. They also stated that good ratings on the platform are a way to validate their choice of preferred publication. Only 4% indicated a willingness to use Beehive as their primary discovery platform, but only if content and user experience were identical to their preferred publication's app.

As a unique, large-scale news verification platform, Beehive News is reshaping the media landscape, fostering an era where truth prevails and quality journalism receives the recognition it deserves. It therefore extends an invitation to journalists, media professionals, and discerning readers to join this transformative endeavor and help readers navigate the overwhelming world of information.
