BENICOIN-Football Betting Revolution base on Blockchain Technology

Saturday 13 January, 2018

1.INTRODUCTION

Firstly, let's look back the International Football Betting History. The Football Pools started 90 years ago this year. Within months, hundreds of thousands of fans were filling in weekly coupons, attempting to predict Saturday afternoon's results in the hope of winning cash prizes. In 1961, Viv Nicholson, a factory worker from Castleford, won a £152,000 jackpot, equivalent to almost £5m today. More than £3.2bn in winnings has been paid to 61m people over the years and more than 500,000 people still play the pools each week. In the recent years, there are many changes. The growth of the internet and mobile devices with quick access to odds has made betting generally much more accessible. Satellite television channels and increased coverage of live football matches around the world has increased interest and opportunity. With it has come the widespread use of "in-running" betting, where punters can stake money on the action as it happens - for example, who will score the next goal, with odds fluctuating on the pattern of play. Online football betting has mushroomed since it first became significant before the 1998 World Cup and Euro 2000. How much is the sports betting industry worth? "The current estimations, which include both the illegal markets and the legal markets, suggest the sports match-betting industry is worth anywhere between $700bn and $1tn (£435bn to £625bn) a year," says Darren Small, director of integrity at betting and sports data analysts Sport-radar. About 70% of that trade has been estimated to come from trading on football. With the great potential of this SPECIAL industry, BENICOIN has been researched in a long time and developed with online platforms where you can bet any football matches anywhere, with any whom easily/speedily and clearly. Releasing the not good points of Traditional Football Betting methods, the block-chain technology has created wonderful experiences for Punters, removes all the barriers among them. It really is a big revolution in online Football Betting industry. There are no organization or individuals able to sway the market but the BENIERs community will control and develop itself. You maybe have never experienced the Football Bet transparency anywhere except BENICOIN BETTING environment, with very low fees and fast speed.

Beside, BENICOIN has been created as a digital money transaction method to help us joining in modern life easier. It is designed to not only become a digital currency but also become the most friendly digital one for Users. With the current traditional money transaction methods, there are a lot of disadvantages. The first, we can see the users of traditional methods are being charged a high fee when they make transaction across the border, and even a huge amount of maintenance and warranty costs for software and hardware devices. Secondly, it would be time-consuming when transferring money among different banks or different nations. Moreover, Administrative barriers are really time consuming and troublesome. To solve these not good points, BENICOIN has been created as a digital money transaction method to help us joining in modern life easier.

while the use of BENICOIN must be accepted and solved, their bigger potential, beside others such as safe driving, help children with their learning, open and upgrade people’s lives. In reality, helpful applications of BENICOIN in schools, houses and hospitals, have developed massively. The inventions based on computers, voice recognition, natural language analyzing have given them reasons to change and renew, while advancements of science and technology is happening in related aspects. BENI is also changing how people interact with technology. Many people have become familiar with touching and talking to their smartphones. Future relationships between human and machines will be more decorated, smooth and more personalized than ever when BENI systems learn how to adapt to personal characteristics and purposes.

2.WHAT IS BENI COIN?

BENICOIN is designed to not only become a digital currency that can meet the highest advanced technology standards but also become the most user friendly digital Coin.

• Block-chain technology

• Decentralize
