BitcoinBourse.eu relaunch! – Welcome to the future of Bitcoin exchanges!

Wednesday 5 March, 2014

We are proud to announce that the new Bitcoin Bourse (https://BitcoinBourse.eu|) is up and running!

We have rebuild our trading engine and we have redesigned the full site, making it more user friendly!

Please check out the new design and features and enjoy!

Why Bitcoin Bourse is the future of Bitcoin exchanges?

Traditional centralised Bitcoin exchanges have business models similar to traditional financial services enterprises. They take deposits of fiat currency which they hold in company controlled bank accounts and show as a credit in the customer's exchange account hosted on their corporate servers.

The essential characteristic of a decentralised exchange like Bitcoin Bourse is that bitcoins and fiat currency are exchanged directly person-to-person with the arbitration of a third party when disputes arise. Rather than a few centralised exchanges that a government can easily monitor and shut down for not following capital controls or chargeback rules, any two people wishing to exchange bitcoins for fiat money can do so directly within Bitcoin Bourse.

Person-to-person Bitcoin exchanges like Bitcoin Bourse can also offer faster settlement directly between bank accounts (or in cash) where as centralised exchanges often impose delays when cashing out or adding funds, especially during times of high market volatility.

New features!
Bitcoin Buy and Sell orders have now a expiration time of 72 hours!

Share trading is now also open to public!

Users and System shareholders of Bitcoin Bourse System shares can now trade shares btween them!

Its very Simple! Just create your buy or sell offers with the amount you want for each each share.
