BlockchainArmy Founder President EROL USER announced BCA ID to overcome the CORONA pandemic obstacles

Wednesday 8 April, 2020

Blockchainarmy is excited to announce the launch of BCA ID for the governments and people use.

A blockchain based digital id which helps you track spread of coronavirus and offers information and e-service. The Mobile application is making use of Blockchain to store user health data and use corona patient test records.

Features of the mobile application:

User can signup on the application, verify their id and upload their health records. The user can see the location of the COVID 19 test center

Information about the virus and precautionary measure are updated as new information is available. The patients can book an appointment to test for corona virus.

COVID 19 test: Locate test center and also raise schedule tests.

All government updates and notification can be viewed by user and stay away from fake information.

Test reports and previous test results will be stored in the mobile application.

They can see the virus spread information and real time updates on the app,

The application will make use of GPS to track the user movements and if they come in contact with someone who is diagnosed, with coronavirus,.

Privacy by design, All the user data is encrypted and stored over a blockchain network, providing greater privacy and security for user data. Also the information stored cannot be manipulated, hence it is single source of truth. User health records are also stored on the mobile app to instantly access them in time of need, User can contact emergency service with a click during an emergency.

The application will help governments to prevent the spread of coronavirus and take precautionary measures and constantly update the user about the current situation. It will also allow them to avoid spread of fake news.

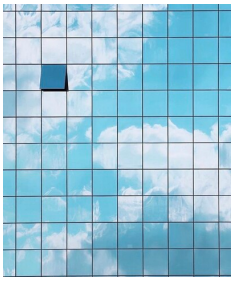

Blockchainarmy Is committed to its efforts to help the government use technology to mitigate the risk during pandemic.
