Breathe a Sigh of Relief this Winter with Salitair Salt Therapy

Wednesday 19 November, 2014

Winter can be a worrying time of year for those with respiratory troubles, including those who suffer with Chronic Obstructive Lung Disease (COPD). Ease your worries, and your suffering this year, with The Salitair Salt Pipe - a unique and entirely natural remedy that calms and cleanses the cells of the respiratory system.

With coughs and colds abound, and if your chest is already weak then these minor afflictions can become a serious problem. Clinical tests have shown that Salitair™ can produce immediate improvements and in some cases users have reduced and even given up their dependence on conventional medications. Plus as a completely natural product, it has no side-effects whatsoever. Salitair has been favorably reviewed by Dr Chris Steele on ITV's This Morning programme. It helped Dr Steele through a spell of laryngitis and he also witnessed how effective Salitair was on treating his secretary's asthma condition, by reducing her dependence on steroid inhalers.

Salitair™is a handy, easy to use 'pipe' filled with salt crystals from the Transylvanian Praid salt mine. When using the pipe, the moisture of the passing air absorbs the micron sized particles of salt that then penetrate into the respiratory system. The active ingredients induce natural self-cleansing mechanisms that flush away impurities from the surface of cells. Salt particles also mechanically clean the air passages.

John Moran, a COPD sufferer from Stoke-on-Trent said: "All COPD and bronchiectasis patients should have a Salitair pipe! I have suffered with bronchiectasis for 30 years and can't believe how easy it is to get the mucus up from my chest. I've been using it for 4 weeks and cannot believe the difference it has made. I also purchased one for my grandson, who suffers from asthma, and he has not had to use his inhaler half as much. Anyone who suffers with COPD, Bronchiectasis and Asthma should invest in this piece of equipment, it really works".

Using the Salitair™ is simple. Place the open end in the mouth and inhale, and then breathe out through your nose. A 15 minute daily treatment is all you need, perhaps while watching TV or reading a book. It is suitable for all ages and will last for around 5 years with the recommended daily use. To ensure maximum hygiene and effectiveness, it is recommended to change the refillable salt every 4-6 weeks.

Salitair™ can be used to treat respiratory conditions such as asthma, allergies, COPD, hayfever, common colds and infections and problems caused by smoking.

Priced at £19.95, Salitair™ is available from Tower Health or by calling 0800 953 1666.

Established in 1999, Tower Health is one of the leading natural health and online pharmacies in the UK. In the spring of 2014 a dedicated online pharmacy department was launched to offer both natural and pharmaceutical brands to an ever growing and aging population in the UK health market.
