Buy Bitcoin Website eCoin.eu Announces Zero Fees on Bitcoin and Litecoin Trading

Wednesday 7 January, 2015

Unlike Other Bitcoin Marketplaces that Charge a Commission, Visitors to eCoin.eu No Longer Have to Pay a Fee

eCoin.eu, a website that allows people to sell and buy Bitcoins and other types of crypto currencies, has just announced that they are now offering zero fees on Bitcoin and Litecoin trading. As a company spokesperson noted, while all other marketplaces have a fee, eCoin.eu is now allowing people to trade without paying a commission.

For people who would like to sell or buy Bitcoin but are unsure what it is, the company spokesperson explained that Bitcoin is a digital or crypto currency that was developed in 2009.

As the first online currency, people can buy or sell Bitcoins to other individuals, all without the need of going through a traditional payment processor like a bank. Like fiat currency, Bitcoins are acknowledged as a legitimate form of payment.

In addition to saving people money with their new no-fee trading, eCoin.eu also provides them with a convenient and safe place to buy, sell or trade Bitcoin. The 24/7 online exchange offers members immediate and automated matching of their orders. Those who are interested in starting to buy or sell Bitcoin simply need to open a free account at eCoin.eu. As the spokesperson explained, eCoin.eu is also the only website that offers an arbitrage service; people can visit the site to find out the current exchange prices for the different crypto currencies and how much they could possibly make by buying or selling them.

For those who are wondering if eCoin.eu is safe, the company spokesperson provides welcome reassurance. "Our main goal is to keep clients' personal data extremely safe and secure," the spokespersonsaid, adding that they take great precautions concerning security in their system and are constantly monitoring for any activities.

"eCoin.eu is protected with Comodo SSL Certificate which has the 2048 bit signatures and up to 256 encryption mean an SSL Certificate offers the highest possible levels of security for our customers."

In addition to being safe and secure, the eCoin.eu website also offers fast Bitcoin deposits. The company's innovative system processes them right away and they will be deposited into the person's account after eCoin.eu gets three confirmations from the Bitcoin network.

Anybody who would like to learn more about eCoin.eu is welcome to visit the user-friendly website; there, they can read about Bitcoins and other crypto currencies and, if they desire, open an account and start buying, selling and trading.
