CCS G-Cloud 13 Framework Agreement listing for Altuity's SaaS technology.

Wednesday 21 September, 2022

Altuity Solutions Ltd, a UK-based developer of SaaS facilities management (FM) software, has successfully secured inclusion on the UK Crown Commercial Service's (CCS) **G-Cloud 13 framework**.

G-Cloud 13, which starts on 9th November, 2022 is a Digital Marketplace managed by the CCS. CCS supports the public sector to achieve maximum commercial value when procuring common goods and services. In 2021/22 CCS helped its customers achieve commercial benefits totalling over £2.8 billion of public money.

Altuity is listed in Lot 2 - Cloud Software (SaaS). This will make it easy for ***public sector and third sector organisations,*** for example, local authorities, charities and housing associations to procure Altuity's SaaS CAFM solution.

Altuity's software helps create safe and compliant spaces for people to live, learn, work and play in. The software provides asset, maintenance and compliance management functionality for facilities managers, asset managers and compliance managers. It does this by mapping an organisation's data onto site and floor plans, on maps for external features, in 360-degree photogrammetry and 3D.

Steve Voller, founder, commented:

> "Cash strapped and often under-resourced public and third sectors need to do more with less. Enabling people to work smarter not harder makes a huge difference. A place on G-Cloud 13 makes it easy for public sector and third sector organistions to access our software and services. It also allows us, as an SME, to be on an equal playing field alongside larger competitors."

ENDS

About Altuity

Altuity was founded in 2014 to make it easier for those managing buildings, estates, assets and buried services to access information and gain insights from the data being managed.

With its intuitive software, using advanced visualisation technology that combines maps, floor and site plans, 360° photospheres and 3D data, Altuity delivers asset management solutions and a truly unique approach to managing data and information.
