CIGNEX Datamatics Presents Webinar on Transforming your Intranet into a Digital Hub of Collaboration & Innovation

Monday 29 February, 2016

London, UK | Ahmedabad, India: CIGNEX Datamatics, a Silicon Valley, pure-play, Open Source consulting company will be hosting a webinar on “Transforming your Intranet into a Digital Hub of Collaboration & Innovation” for US on March 1, 2016, 10 AM, PST and for UK & India on March 8, 11 AM BST & 4:30 PM IST respectively. The webinar will showcase how an intranet can be transformed into a social hub which can engage employees by driving conversation, participation and sharing among individuals and groups.

The static one-way communication vehicle of the standard corporate intranet cannot address employee disengagement which is one of the biggest challenges faced by organizations today. There is an urgent need for enterprises to embrace digital engagement platforms that drive increased employee engagement and collaboration while measuring the level of participation.

In this webinar, we will demonstrate how CIGNEX Datamatics' Digital Employee Engagement Platform (DEEP™) combines the best of traditional Intranet features like documents/content sharing, department work space with the modern social network features like instant messaging, organic sharing of ideas through posting, liking & commenting to make your corporate intranet a thriving digital hub that significantly improves employee engagement.

“CIGNEX Datamatics' social intranet – DEEP™ is the latest evolution in virtual collaboration, and a great solution to many day-to-day business problems. It combines the traditional functions of a company intranet with enterprise social capabilities to create a seamless collaboration environment which fuels team collaboration and innovation.” said Harish Ramachandran, Founder & VP - Strategic Business, CIGNEX Datamatics.

For more information and to register, visit the webinar page. The event will also be recorded and available for on-demand viewing.
