Clinichub offers patients safe weight loss treatments and 5-star services at accessible prices

Wednesday 12 October, 2022

Turkiye is one of the leading countries in offering bariatric surgeries, with excellent patient care given before and after procedures. Leading provider Clinichub offers a wide range of cosmetic surgeries, dental treatments and hair restoration treatments, as well as weight-loss surgeries that are distinguished by their outstanding VIP-quality patient care and service.

ISTANBUL - Obesity is increasing globally, and according to the World Obesity Federation's World Obesity Atlas 2022 it's estimated 1 in every 5 women (and 1 in every 7 men) will suffer from obesity by 2030. This means 1 billion people will be struggling with obesity by 2030. Bariatric or weight loss surgeries play an important role fighting against obesity, which has been shown to trigger other health issues. According to Cleveland Clinic study, patients can lose up to 40% of their weight after surgery which helps to reduce the risks of cancer, diabetes and other diseases. Clinichub is Turkiye's leading health tourism agency with both experience and an impeccable track record on cosmetic surgery, hair and dental restoration treatments as well as bariatric operations. Clinichub's offering combines comfort and safe procedures with a 5-star quality service at affordable prices.

Noting that Clinichub's highly experienced partner surgeons help people from all over the world to – provide tailor made solutions, Clinichub Co-founder Basar Cetin said, “The incidence of obesity is increasing rapidly in the world, but unfortunately, the price of the procedure is also rising. Patients may find it difficult to access treatments at these prices in Europe and North America. With an average price of EUR 3,500, Turkiye is one of the most affordable destinations in Europe. Also Turkiye’s success is due to its health infrastructure, 5-star quality service standards and high-level treatment techniques which employ the latest technologies, with our specialist physicians and thanks to our comfort-oriented service approach,” he added.

Health assurance with a personalized treatment plan

Remarking that they also provide hospitality services, Cetin explained, “We know that traveling to another country for treatments can be difficult. To this date, we mediated more than 100,000 patients with their consultations and welcomed more than 10,000 international patients from all over the world. Our clinics make healthcare services not only possible but also accessible and achievable. We are a one-stop address to meet every need our foreign patients may have. We ensure their comfort in health travel by providing VIP transfer services at the airport, accommodation in a 5-star hotel, 24/7 specialized doctor and nursery services during their stay and post-operational services. Our personalized treatment plan is mapped out by our specialist surgeons and followed up by our medical experts.”

Stomach reduction surgeries hit the target

Reminding that weight loss treatments are divided into gastric sleeve, gastric bypass and other bariatric treatments, Cetin added, “We entrust our patients only to the highly experienced surgeons and the best solution for each patient recommended by our physicians during their consultations. To date, Clinichub is one of the leading health tourism agencies in Turkiye thanks to our expert surgeons, hospital infrastructure and advanced technologies available at our clinics.”
