Positioning Cloud2 as a Strategic and Innovative Partner through Cost-Effective and Sustainable Ways.

Cloud2 deliver successful SharePoint to the NHS. They combine pre-configuration, super-fast build and flexibility; offering NHS critical solutions such as policy management, productive team working, enterprise search and governance, Business Intelligence, and will be attending the Healthcare IT Exchange.

The Exchange is an invitation-only event which brings together CIOs, IM&T Directors, CCIOs, government representatives. Attendees have the chance to meet, discuss, network and benchmark against some of the world's most renowned healthcare informatics leaders, whilst engaging with the market's most innovative solution providers in private, pre-scheduled one-to-one business meetings, to decide the future of their IT strategy.

With speakers including;

- King's College Hospital NHS Foundation Trust, Director of ICT
- St Barnabas Lincolnshire Hospice, Head of ICT
- St Helens and Knowsley Health Informatics Service, Consultant Plastic Surgeon and CCIO
- Sherwood Forest Hospitals Foundation Trust, CIO
- Royal Cornwall Hospital Trusts, Director of Transformation
- Doncaster And Bassetlaw, Director, of ICT
- Taunton and Somerset NHS Foundation Trust, Director of informatics
- Belfast Health and Social Care Trust, Co-Director of IT and Telecommunications
- Barts Health NHS, Chief Clinical Information Officer
- University Hospitals of Morecambe Bay NHS Foundation Trust, Consultant Gastroenterologist, Clinical Director for Elective Medicine, and Informatics Clinical Lead
- Royal Brompton and Harefield NHS Foundation Trust, CIO
- NHS England, Open Source Programme Manager

The event is specifically designed for healthcare informatics leaders to help solve current challenges whilst also optimising the next wave of opportunities. Cloud2 has worked closely with the Exchange team to craft a programme that showcases best practice, inspires with new concepts, and tackles major industry challenges.

Download the full agenda here: http://bit.ly/1CsyPjw

But that's not all, the Exchange isn't just about the programme - it is a meeting that the participants define through their active involvement and contribution to the many discussion and networking elements. The tailored programme and the outstanding speaker line up creates an environment of thought leadership, innovative problem solving and industry collaboration. Added to this are the select group of solution providers attending, and this means that everyone leaves with a robust business plan plus the critical support and networks to take them forwards.

Simon Hudson, Cloud2's Director comments:

"We are pleased to be attending the 2014 Healthcare IT Exchange as it gives us a platform to meet and discuss the industry pain points with CIOs, IM&T Directors, CCIOs and government representatives, and critically it allows us to show them how we can help with their biggest challenges."

About Cloud2

Cloud2 specialise in providing successful SharePoint and BI solutions for the NHS and the private sector. Their expertise is to combine pre-configuration, for super-fast build and deployment, with flexibility to make them adaptable to an organisation's needs.

Our innovative *Hadron* suite of products is designed to deliver a world class transformational intranet and

is proven in major health organisations. *Hadron Prime* focuses on readiness, strategy and priorities, *Hadron 8020* is the largely pre-configured intranet platform built in SharePoint, *Hadron 365* is the cloud-based enterprise intranet for SharePoint and *Hadron Embed* focuses on user adoption and productivity.

Cloud2 delivers transformative BI capabilities and business insights. We enable organisations to effectively and rapidly use the data they have as well as creating new intelligence and reports to provide enhanced and faster decision-making.

Meson-BI was developed utilising our experience in SharePoint, BI and the creative use of Microsoft's new Power BI suite of products. Following an objective one-day audit, we produce interactive reports and customised dashboards to meet customers' specific requirements. A high impact and easy to use portal available on-premise or on Office365 makes it easy for users to store, manage, share and view all their valuable BI assets. Cloud2 delivers exceptional solutions that enable organisations to effectively use the data they have and create new intelligence to provide enhanced and faster decision-making.
