ColosseoEAS lights up new HD center hung video board for KHL season opening!

Wednesday 24 August, 2016

Metallurg Arena, a home venue of KHL champion Metallurg Magnitogorsk was equipped during the summer with the amazing new technology additions by ColosseoEAS.

Monday's grand opening of the 2016/17 KHL season revealed the arena's brand new, custom-designed HD center-hung videoboard along with ultra slim ribbon boards and complete Colosseo Single Media Platform – the all-in-one content delivery system for game presentation and infotainment that handles all media inputs, creates advanced instant replays, manages advertisement, graphical content and delivers it to every connected LED screen.

The new LED inventory has received very positive feedback from both fans and arena management and ColosseoEAS now proudly serves six KHL arenas with its technology.
