COREBIOTICS - The first supplement combining seven natural compounds to improve health and fight disease

Wednesday 8 June, 2016

An increasing number of plant compounds are being proved effective to treat major illnesses with fewer side effects than synthetic drugs. Now Corebiotics has created 7 Wonders - a easy-to-take balance of seven naturally occurring substances - carefully blended to provide optimum health and to treat many of the diseases that challenge us today.

Turmeric - a significant contributor to preventing and treating lung disease and cancers

Ginger - a powerful anti-inflammatory and carminative against rheumatism, arthritis and stomach problems

Garlic - long known for aiding digestion and boosting the immune system is also now being investigated for potential cancer prevention properties

Cinnamon - recent research shows that cinnamon may have a powerful role in helping manage diabetes

Cayenne (Capsaicin) - extracted from certain hot peppers, appears to have the ability to alleviate angina and may also speed weight loss

Bee pollen - the antimicrobial and antiviral properties of this substance are long attested

Piper Nigrum (Black pepper) - offers valuable carminative properties and has been used for centuries in aromatherapy to ease aches and pains.

These seven natural compounds - in combination - are transformational, bringing huge benefits to health and well-being. The Corebiotics team has travelled the world to find the best sources of these health products which are then expertly formulated by our UK-based nutritionists and herbalists to Good Manufacturing Practice standards. Because this powerful but gentle formulation doesn't build up in the body over time, it won't cause future problems. As a result, the 7 Wonders supplement offers wonderful health benefits, with far fewer side effects. **7 Wonders - the power of nature, sevenfold!**
