London / Warsaw, [12.01.2026] — [SINGU](#), one of Europe's leading cloud-based software providers for facility, maintenance, ESG, and building management solutions, today announced that [Dominic Gallello](#) has joined the firm as Chairman of the Board.

Mr. Gallello is an established technology leader with a deep background in engineering and enterprise software solutions. Throughout his career, he has built a strong track record of developing award-winning products, driving intense customer focus, and scaling globally recognized brands. His products have earned more than 50 industry awards, including two R&D 100 Awards, widely regarded as the "Oscars of Innovation," as well as the company-level "Best Work Culture" Timmy Award. Collectively, his product portfolios have generated several billion dollars in revenue.

As a CEO, Mr. Gallello successfully led his last three companies from approximately \$300 million in valuation to roughly \$1.3 billion in exit value, and he has been recognized as a SaaS Top 50 CEO and an "Achievement in Management" Gold Winner for Advancing Industry 4.0 Realization. Mr. Gallello brings decades of senior leadership experience across the Architecture, Engineering, and Construction (AEC) technology ecosystem. He has held executive and board roles at some of the industry's most influential platforms, including Intergraph / Hexagon, Autodesk, and Graphisoft, helping guide enterprise adoption, global expansion, and long-term strategic growth.

In addition to his commercial leadership, Mr. Gallello serves as Chair of the Investment Committee for Commercial Strategy at the Defense Advanced Research Projects Agency (DARPA). He also serves as a Board Member at PlanHub, a leading digital marketplace connecting contractors and suppliers across the construction industry.

"Dominic's appointment marks an important milestone for SINGU," said [Paweł Malon](#), Group CEO. **"He brings a rare combination of deep software expertise across AEC and the built environment, proven experience in building and scaling global enterprise platforms, and leadership at the forefront of mission-critical innovation. As we accelerate our international expansion and strengthen SINGU's position as a category-defining platform for property operations, Dominic's perspective across the full lifecycle of the built environment—from design and construction through long-term operations—will be invaluable."**

Mr. Gallello commented, "SINGU is addressing a critical gap between construction delivery and long-term facilities operations. I look forward to supporting the team as they scale the platform and help modernize how the built environment is managed."

In his role as Chairman, Mr. Gallello will work closely with SINGU's executive team and board to guide strategy, governance, and international expansion.

About SINGU

SINGU Group is a European leader in cloud-based software for property, facility, maintenance, ESG, and building operations management. The Group brings together SINGU, [Micad by SINGU](#), and [net-haus by SINGU](#) — combining deep regional expertise and decades of domain knowledge into a unified, future-focused real estate technology platform.

The Group serves large-scale healthcare, logistics, retail, and commercial real estate portfolios, with a particularly strong leadership position in healthcare and logistics, where operational complexity, compliance, uptime, and cost efficiency are mission-critical. SINGU Group's CAFM and CMMS solutions enable centralized, scalable, and data-driven property operations across the full asset lifecycle.

With operations in more than 40 countries and over 250 million square meters of managed space, SINGU Group supports owners, operators, tenants, and users in improving operational efficiency, ensuring compliance, reducing costs, and increasing asset value.

Dominic Gallello joins SINGU at the Group level as Chairman of the Board, supporting long-term strategy, governance, and international growth across all Group companies.
