

Dr Now Opens New Development & Technology Department in Manchester

Monday 16 November, 2015

The Liverpool-born telehealth company has acquired new office space at MediaCityUK's Digital World Centre.

Dr Now, part of Now Healthcare Group, is delighted to announce that its Development & Technology division will be relocating to Manchester's famous MediaCityUK as part of the company's continued expansion.

The team will now be occupying prime office space in the Digital World Centre at the heart of MediaCityUK, making the move from Liverpool's Albert Dock.

The business has enjoyed phenomenal success since the launch of its innovative mobile app in June earlier this year, with this exciting relocation testament to the progress that the company has made as it continues to provide a flexible and accessible solution to healthcare for patients around the United Kingdom.

Founder of Now Healthcare Group and Dr Now, Lee Dentith, made the following statement:

"We're delighted to be in a position to expand the business at Dr Now and we're thrilled to announce a new office for our development and tech teams in one of the most vibrant, progressive and exciting areas of the North West."

"Although we're extremely proud of our Liverpool roots, we feel that this move will allow us to make the most of the growing digital opportunities in Manchester and help to further cement Dr Now's status as the number one telehealth organisation in Britain."

About Dr Now

The Dr Now mobile application for iOS and Android connects patients with a fully-qualified, MRCGP-certified doctor via remote video call. Patients can choose to speak to a male or female of their choice, at a date and time to suit them for a flexible solution to their primary care issues.

Dr Now then dispenses medicines to the patient's home or office, with next day delivery guaranteed and delivery in 2-4 hours for those in central London.

Dr Now is available to members of the general public, with a range of corporate packages also available to businesses looking for an alternative to private medical cover for their employees.
