

Ecoduka Launch New Line Of Recycled Bags Made Using Recron® GreenGold

Tuesday 14 June, 2022

This exciting new range of eco-friendly recycled bags uses [Recron® GreenGold fabric](#) that is made from 100% recycled plastic bottles. This new and improved version of rPET has bags of eco-credentials that make it a superior sustainable material.

Plus, every bag is embedded with tracers that enable you to verify exactly where the product was made.

Superior When It Comes To Sustainability

As a business that is built on sustainability, Ecoduka are always searching for ways to make their products even greener. Well, these new Recron® GreenGold bags don't disappoint.

They are made with renewable energy, without any harmful chemicals and approximately 90% of the water used in their production is recycled.

Whatsmore, none of the above negatively impacts the quality of the fabric either. In fact, these rPET bags match the quality of a bag made with virgin fibres with the added bonus of superior dyeing performance and enhanced whiteness.

Discover Our New Range of rPET Bags

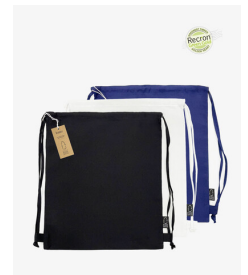

Within this collection you will find five different styles of bag all available in Black, White and Navy. This includes a classic tote, a small gift bag, a sling tote, a drawstring pouch and a drawstring gym bag.

Each bag is GRS certified and comes with a woven outer label and a tag that details the closed-loop production involved in the creation of the bag.
