eComCharge introduces a new payment widget with 3-D Secure verification inside

Tuesday 13 November, 2018

eComCharge, the developer of the white label payment gateway, has announced a release of a new payment widget for the payment service providers, with 3-D Secure verification inside the widget.

Riga, Latvia, November 13, 2018. beGateway, a white label payment gateway developed by eComCharge, is now fully integrated with a number of acquiring banks from the UK, the EU countries, the USA and the CIS countries, bank-links for the Baltic States, e-wallets, pre-paid vouchers and other payment systems, including Allied Wallet, Skrill, Neteller, Qiwi WebMoney, Yandex.Money, SafetyPay, TrustPay, MuchBetter, CashFlows, UPaySafe, APCO, TicketSurf, CashToCode, etc.

"To launch a new payment widget you just need to place 24 lines of code on the site", - Oksana Mikhailovskaya, Chief Marketing Officer at eComCharge commented. “Payment methods are connected automatically according to the merchant settings within the system. Merchants can adjust the fields of the requested information", - she explained.

"The widget is easy to install, besides, the entire payment process, including 3-D Secure verification, takes place on the page of the site or mobile application inside the widget, without redirection to another browser window. These are the functions of the payment widget, which were primarily requested by tenants of our platform for their clients", added Oksana Mikhailovskaya.

CMO at eComCharge also said that the team is actively engaged in updating the entire system of the white label payment gateway beGateway; the introduction of important features, and new integration with acquiring banks and other payment systems, on request of their tenants - payment service providers.
