ENTIRE FLEET OF ALIENS ENCOUNTERED IN UK

Saturday 31 May, 2025

British woman Caron Ara reportedly encountered an entire fleet of extraterrestrial beings while cycling alone at night in Wiltshire, UK—a region long associated with alien sightings and crop circles. The beings appeared to possess technology that defies known laws of physics, including invisibility, shape-shifting, and extreme evasive capabilities. Despite their elusive nature, Caron managed to film some of their extraordinary craft, which displayed manoeuvres, speeds, and G-forces that no human could withstand.

The fleet was predominantly light grey in appearance, with one craft standing out due to its shiny metallic silver design. The beings were small and lightweight, with low-ceiling craft interiors. Some initially turned invisible upon being seen but later reappeared and interacted with Caron. The crafts often tilted onto their sides and were surrounded by a silent amber energy, believed to power them.

Two crafts—one metallic and one non-metallic—reportedly observed Caron from just eight feet away behind nearby trees. She describes the beings as spiritually advanced and peaceful, claiming they have visited Earth for a very long time. Caron has encountered them on multiple occasions, including once on Guy Fawkes Night, where she observed them watching fireworks. She describes these as incredible and highly unlikely close encounters.
