

ep Group and Pixii launch new distributed energy business in the UK

Tuesday 24 June, 2025

LONDON 24 November 2025 – UK-based energy transition company ep Group and Norwegian battery energy storage specialist Pixii have launched a new joint venture to meet the growing demand for distributed energy systems across the UK.

The new company, **ep Pixii**, is based in London and led by Leo Bedford. It will focus on delivering integrated energy solutions for the Commercial Real Estate, Residential Development, and Industrial sectors – helping energy users reduce costs, unlock new revenue streams, and strengthen resilience.

“ep Pixii is our platform for accelerating the shift to distributed, decarbonised, and digitised energy systems,” said Dr. Steven Fawkes, Managing Partner at ep Group. “We are combining Pixii’s proven battery and power conversion technology with ep Group’s project delivery experience and deep client relationships to help property owners and investors turn energy infrastructure into a competitive advantage.”

ep Pixii will act as a system integrator, offering tailored solutions that combine Pixii’s advanced battery systems with solar, EV charging infrastructure, and other on-site technologies. The joint venture also includes **Falcon**, a proprietary platform developed by ep Group that leverages the latest software and technologies to optimise value across energy generation, self-use and participation in grid services.

Kenneth Bodahl, CEO of Pixii AS, said:

“The UK is a key market in our global expansion. With ep Pixii, we are bringing together local expertise and leading-edge technology to offer scalable, revenue-generating energy systems - from residential to industrial scale.”

Morten Angelil, Chairman of Pixii and CEO of Eltek Holding, added:

“Our heritage in energy conversion goes back more than 50 years. With ep Group, we are continuing that legacy - combining hardware, software, and systems thinking to meet the needs of the next-generation energy market.”
