Forth Blinds Increases its Product Range with Urban Shutters

Monday 14 March, 2022

Since 2015 when **Forth Blinds** was first launched they have grown their product range and increased the area they serve. They started out in Prestonpans, supplying and fitting window blinds in local homes and business premises. Since then, with a reputation for quality products and great workmanship at fantastic prices, they now fit new blinds in Edinburgh and throughout the Lothians. They also take on an increasing number of large projects, fitting blinds in new social housing and rental homes.

Forth Blinds is now delighted to announce that as a Louvolite accredited supplier, they can supply and fit Louvolite's Urban Shutters. Phil O'Brien, owner of Forth Blinds said, "Urban Shutters are a great addition to our product range. We know they will be popular, especially in the many new build homes we supply. Adding new products to our range ensures that we can always offer our customers the best window coverings available in the market."

About Urban Shutters

Urban Shutters look similar to traditional louvred shutters, but instead of being made of wood, they are made from striking polysilk vinyl. With various frame options and shutter styles, there will be a style to suit all windows and homes. There are many fantastic benefits to choosing Urban Shutters for your home. Not only do they look luxurious and contemporary, but they provide shade in the summer and help insulate your home during the colder winter months. The shutters are custom made in the UK to fit your windows perfectly and are extremely durable. They will never require painting and any damaged louvres can be replaced. Sometimes it can be difficult to find the perfect window covering for a kitchen or bathroom due to moisture and potential water damage, however, Urban Shutters are perfect for these rooms as they are moisture resistant.

It is important at Forth Blinds to be as environmentally friendly as possible and to sell products with high environmental credentials. Urban Shutters meet all regulations relating to the emission of organic compounds and are 100% recyclable.

At Forth Blinds, we are looking forward to fitting many Urban Shutters into homes in Edinburgh and East Lothian. We think they look fantastic and we know our customers will too.
