### SELF-ESTEEM

Self-esteem is our opinion of our abilities, positive regard or self-love we have for ourself and begins in childhood.

Stress and difficult life events, such as broken relationships, serious illness, bullying, unemployment or a bereavement, can have a negative effect on self-esteem. You may have found it challenging to live up to your own or other people's expectations of you.

While everyone occasionally has doubts about themselves, low self-esteem can leave you feeling insecure and unmotivated and reduces our confidence.

The Masterclass is going to show us how to raise our self-esteem and how meditation reduces negative self-image.

### CONFIDENCE

Confidence can be described as a belief in ourself, that we have the ability to meet life's challenges and to succeed and act a way that conveys that belief. Being confident requires having a realistic sense of our capabilities and feeling secure in that knowledge. Our confidence is dictated by a corresponding level of self-esteem.

The Masterclass is going to show you how we can increase our confidence in everyday life and how meditation gives you the strength to step beyond barriers.
