FREZYA releases ‘FURTIVA’ as a clearance-ready, royalty-free music asset for gaming, film and online creators

Wednesday 28 January, 2026

Delaware | Munich – Lokidio Lab announces that the debut single from virtual vocalist FREZYA, the seven-minute cinematic track “FURTIVA”, is now available to global creators as a commercial, royalty-free audio asset with a clearly defined license.

Rather than being released as a conventional single only, FURTIVA is positioned as a classified audio asset: a long-form, Leonida-aesthetic–inspired “midnight heist” piece designed for use in interactive and narrative media. Musically, FURTIVA blends dark, Mariachi-inspired brass with phonk-weight 808s and an Amapiano-leaning rhythmic grid – a modern hybrid built for night-drive sequences, high-risk missions and extended set-piece storytelling.

In parallel with the track, Lokidio Lab is launching the LPSV-01 Open framework - a license standard that treats music as a technical asset rather than a subscription product. Under LPSV-01 Open, FURTIVA is released as a clearance-ready track with:

- **full commercial, royalty-free usage rights** for eligible creators (no subscription, no per-use fees, no revenue share for covered uses)

- a **PDF certificate** that can be presented to platforms, publishers or partners as proof of license

- **protocol metadata** designed to support verification and reduce Content ID / DMCA friction wherever reasonably possible

“Our goal is for music to function like a predictable, verifiable digital asset – something creators and studios can integrate without worrying that a single track will take their project down,” the Lokidio Lab team said. “FURTIVA is the first iteration of that approach, particularly for gaming, streaming and story-driven environments that lean into the Leonida-style heist aesthetic.”

LPSV-01 Open is aimed at streamers and VTubers, RP communities, game developers, trailer and promo teams, and film, TV and streaming productions that require a clearly documented, verifiable source of music for long-term projects.

FURTIVA is available for listening, **direct download (MP3/WAV)** and **certificate access** via the dedicated FREZYA portal:

https://frezya.ai/

This release marks the first step in a broader FREZYA roadmap. Following FURTIVA, Lokidio Lab plans additional singles across different styles, while keeping the same principles in place: highly original sound design, transparent licensing and formats tailored to interactive media and narrative-driven worlds.

Legal Disclaimer: FREZYA and the LPSV Protocol are independent creative projects by Lokidio Lab and are not affiliated with, endorsed by, or associated with Rockstar Games or its affiliates. Any references to third-party trademarks or fictional locations (e.g., “Leonida”) are used solely for descriptive purposes to illustrate artistic inspiration.

About Lokidio Lab

Lokidio Lab is a studio focused on digital identity and technical audio development. The studio builds sound projects across multiple genres, applying tailored licensing models to match the specific requirements of each release for creators, studios and media projects.
