From lost at Alton Towers aged 4 to New Personal GPS Locating Service in Europe

Thursday 26 September, 2013

•New business start-up offering personal GPS locating service for kids, people, pets, luggage and stuff
•Locate anyone or anything using the PocketFinder GPS device via free apps and website

One of my earliest memories was getting lost at Alton Towers aged 4 (ish). Looking back it is still one of the most frightening things that has ever happened to me as I couldn't find my family, I wasn't meant to talk to strangers and I was a small girl in a busy, loud and unfamiliar place. Eventually I was found after a member of staff approached me but it still took a long time to reunite me with my family. My parents felt awful (it really wasn't their fault I did one!), my Mum and Dad described the first minute of my disappearance as slight worry “she couldn't have gotten far”, the next minute panic set in and the third minute was serious fear and tears...and my three older brothers were very unhappy about not getting on any further rides.

This experience has spurred me on to create and launch TeeCake Location Services using technology to ensure a lost child doesn't remain lost for long and to give parents greater peace of mind when they can’t be with their children. Our service is also ideal for locating people, pets, luggage and stuff.

‘IF YOU LOVE IT, LOCATE IT™’

Our newly launched core services include;

Locate the Kids – for extra peace of mind for parents and guardians. Know the exact location of your loved ones when you can’t be with them using the PocketFinder device.

Locate my people – adult locating services for people with dementia and other difficulties which mean they may get confused and lost. Also, great for businesses to assist in keeping lone workers safer in their working environment.

Locate my Pet – for dogs and other pets. Keep your dog/pet safe by knowing where they are when they run off and recover them quickly and safely. Attached the PocketFinder device to any pet collar to create an instant GPS tracker.

Locate my Luggage – never lose your luggage again. Simply slip the PocketFinder device into your suitcase before check-in and watch it get on the aircraft from your phone.

Locate my Stuff - great for people travelling with high value items such as bikes, golf clubs and artwork. PocketFinder devices are now on sale and for hire at http://www.pocketfindergps.com

END.

Contact Kate Robertson-Hart at kate-teecake@hotmail.com or 07572759825 for further information.

Kate Robertson-Hart started TeeCake Location Services after securing start up investment to finance her idea in late 2012 and is now trading online and will be hiring devices from 2 international airports in 2014. Based in the best city in the world, Manchester, UK.

TeeCake Location Services are an official reseller of PocketFinder from Location Based Tech Inc, California.
