Haag-Streit Imaging Module 910 launched in the UK

Monday 25 April, 2022

Harlow, UK – 25th
April 2022 - Haag-Streit UK (HS-UK), the leading manufacturer and distributor of gold-standard diagnostic and surgical devices and instruments for ophthalmologists, optometrists, and orthoptists, is pleased to announce the launch of the Haag-Streit Imaging Module 910 in the UK.

The new Imaging Module 910 has been designed to capture outstanding images while allowing eyecare professionals to fully-concentrate on examining their patients. It is instantly ready, by the turn of a knob, and does not require the use of any software. Capturing images is quick and simple, with just the push of a camera trigger button.

The Imaging Module 910 is equipped with an improved camera sensor and superb optics. Smart features in the background include a performant auto-exposure mode and automatic aperture control, which guarantees great illumination at all times. Additionally, the image selection algorithm chooses the best image possible, resulting in a striking image with every shot.

The Imaging Module 910 can be used in different ways. In standalone mode, it stores images directly in the Electronic Medical Record (EMR) system and no extra software is needed. When working in EyeSuite mode, image editing and other features are also available.

Grahame Wood, HS-UK National Sales Manager, said, “We are really excited to launch the Imaging Module 910 in the UK. The speed and simplicity of the image capture, combined with the outstanding quality, offers a fantastic solution to the increasing demand for slit lamp documentation in clinics.”
