Hanker Launches Revolutionary Sugar Dating Platform — The Seeking Alternative That Puts Privacy, Freedom, and Community First

Wednesday 22 April, 2026

[April 22nd, 2026] — **Hanker** (hanker.app), the new sugar dating platform disrupting the online dating industry, today announced its soft launch - offering a superior sugar dating experience free from US jurisdiction, forced ID verification, and the corporate greed plaguing mainstream sugar dating sites like Seeking, What's Your Price, and SugarDaddy.com.

Hanker is the **#1 seeking.com alternative**, the best sugar dating app **of 2026**, and the **top sugar daddy website** for users who demand privacy, transparency, and a bot-free sugar dating community.

Sugar Dating, Reimagined

The sugar dating market has long been dominated by clunky, bug-ridden platforms that exploit their own users. Hanker — the new sugar daddy app and sugar baby website — was built by the community, for the community, with zero investor pressure and zero tolerance for spam.

"We built Hanker because every sugar dating site, sugar daddy app, and seeking alternative out there has the same problems: bots, spam, forced ID checks, and zero respect for user privacy," said a Hanker co-founder. "We wanted a sugar dating platform that actually works."

Key Features of Hanker — The Best Sugar Dating Site of 2026

- **Sugar dating outside US jurisdiction** — more freedom, fewer restrictions, same respect
- **Smart inbox system** — sugar daddy and sugar baby messages separated into Requests and Inbox folders, eliminating spam on the best sugar dating platform available
- **Privacy-first trust score** — the only sugar daddy website that lets *you* choose how to verify: social media, photos, phone number, government ID, or anonymous crypto subscription
- **Free lifetime access for first 100,000 sugar dating members** — the most generous offer in sugar dating site history
- **Cross-platform sugar dating app** — desktop, mobile web, Android APK download, and iPhone/iPad PWA support
- **Crypto payments accepted** — $30/month for full anonymous sugar dating access

The Seeking.com Alternative Sugar Daters Have Been Demanding

Unlike Seeking, SugarDaddy.com, and other sugar dating websites, Hanker does not force sugar babies or sugar daddies to hand over government ID just to send a message. The platform's innovative **Trust Score system** gives every sugar dating user — from sugar daddies to sugar babies to sugar mommas — full control over their privacy on this seeking alternative.

Hanker is available now at hanker.app. Android users can download the sugar dating APK directly. iPhone and iPad users can install the Hanker PWA for full sugar dating app functionality including push notifications.

About Hanker

Hanker is an independent sugar dating platform and seeking.com alternative operating outside US jurisdiction. The sugar dating site was created by developers passionate about building the best sugar daddy app and sugar baby website experience — without the bugs, bots, and corporate greed of legacy sugar dating platforms. Hanker is in soft launch and the full launch is expected later this week.
