Help shape Whiskey history with your own personalised cask of Irish Whiskey

Wednesday 10 April, 2019

Blacks Distillery Cask Founders Club is now open to new members, allowing individuals to invest in a personalised Irish Whiskey cask and in the process change the face of Irish Whiskey history!

After six successful years in the world of Craft Beer, Irish Gin and also becoming the first distillery in Ireland to produce rum, Blacks Brewery & Distillery are expanding, with the installation of 2 new copper Irish Whiskey stills onsite in Kinsale, Co.Cork, Ireland.

Blacks Micro Brewery & Distillery is an Irish micro brewery & distillery, founded by husband and wife team Sam and Maudeline Black in 2013, and remains a 100% family owned business who pride themselves on both quality and innovation. Many years ago, Maudeline gave Sam a home brewing kit for Valentine's Day, sparking their passion for brewing. This hobby developed into an obsession and, in 2013, their dreams became a reality when Blacks Brewery was founded. In 2015 a distillery was added to the site, where they began producing a range of Irish craft spirits. Currently, Blacks produce a range of beers, Gin, and Ireland's first and only rum.

2019 will see the expansion of the brewery and distillery, and installation of New Whiskey stills. This exciting development is in part funded by The Founders Club whiskey cask investment scheme, which give a unique chance for people to invest in their very own personalised cask of Irish Whiskey.

The Founders Club is an opportunity for investors to own their very own cask of Premium Blacks Irish Whiskey from the first year of production at the distillery. After five years of maturation investors can have their whiskey bottled as their own label whiskey for resale as a limited edition whiskey or for use as the ultimate personal or the ultimate corporate gifts. One early investor plans to give the resulting bottles of whiskey as business cards to potential clients.

If 400 bottles of whiskey is too much to handle then founders club investors or have the option to sell the entire cask back to the distillery at the predetermined agreed value with a 4% p.a. compounding return to investors on investors initial purchase. Based on one of the casks available, this return equates to a CAGR of 4% per year or a total gross return of 21.7% for the five-year period. Members also have the option to extend the maturation for additional years and allow the whiskey to continue to mature and grown in value as it ages.
