

Horse Rider SOS. An app every horse rider needs!

Sunday 23 May, 2021

Horse Rider SOS

Ride more. Worry less.

A unique app that could save your life, currently run by an 18 year old entrepreneur, Henry Peace, who is trying to make working with one of the worlds most dangerous animals (horses) a lot safer!

The concept is simple. Press 'go' as you set off...the app will then use the accelerometer in your phone to measure your movement.

If you stop moving the app sends an alert to your predetermined contact with your exact location. (An alarm goes off beforehand so this doesn't happen unintentionally)

So if you cant ride together, ride with Horse Rider SOS!

Recently integrated with the app What3words, which has given every 3m square in the world a unique 3 word address, which is quicker and easier to communicate a location than co-ordinates. So help can get to your exact location even sooner.

Recognised by big brands with quotes from;

Horse and hound, ' this app gives you peace of mind that should the worst happen, rescue will soon be on its way'

Horse and rider UK, 'safety should always be your first priority and if your nervous out hacking, take your mobile out and download now!'

Along with an array of features on websites presenting top horse riding apps.

Currently getting a lot of positive feedback from everyone seeing it and gives a lot of hope to a successful app providing safety and peace of mind when riding.

The app is also fully working internationally on android and IOS.
