iCloudHosting Named a Global Leader in Cloud Computing

Friday 18 August, 2017

The Business Intelligence Group today announced that it has awarded iCloudHosting a 2017 Stratus Award in their annual contest. The organisation sought to identify the companies, products and people that are offering unique solutions that take advantage of cloud technologies.

Innovatively utilising the latest Cloud technologies, iCloudHosting ensure resilience, flexibility and value in the provision of a managed server infrastructure. An unrivalled, exceptional level of service, providing comprehensive support while covering the technical infrastructure is at the centre. Clients receive uniquely tailored deployments, expertly developed through an acute understanding of needs coupled with an in-depth technical knowledge.

“The iCloudHosting team are incredibly proud to have been awarded Managed Service Provider of the Year for the second consecutive year. This year they have worked around the clock to develop and deploy a bespoke storage tier now available to all clients that improves performance over other service providers by a factor of three.” said Managing Director Paul Tacey-Green. “This delivers real benefits for our clients for whom performance and uptime is absolutely critical”

“Congratulations to the entire iCloudHosting team for helping accelerate adoption of the cloud and for working to make all of our lives a little richer,” said Russ Fordyce, Managing Director of the Business Intelligence Group. “The cloud is dominating the technology industry and we do not see any markers for that trend not continuing.”

“It is fantastic to see the whole team's efforts publicly rewarded in this way” Paul Tacey-Green continued. “We knew when we set out with this project that it would have far reaching benefits but the proof really seems to be in the pudding with over 90% of our clients recommending our services in the industry. I think it's even more impressive that with all of this technical work going on, that our 3 minute response time to support tickets has been maintained as well!”

About **iCloudHosting**

iCloudHosting own and operate a 60,000 sq ft, Tier-3+ Data Centre in Reading, UK but operate Cloud infrastructure in 4 continents. Specialising in flexible, managed Cloud services at a price-point lower than their competitors, their growth and success has been regularly acknowledged with industry awards. If you are interested in how iCloudHosting could help your company please call on +44 (0) 1582 227927.

About **Business Intelligence Group**

The Business Intelligence Group was founded with the mission of recognizing true talent and superior performance in the business world. Unlike other industry and business award programs, business executives—those with experience and knowledge—judge the programs. The organization’s proprietary and unique scoring system selectively measures performance across multiple business domains and then rewards those companies whose achievements stand above those of their peers.
