

Infinigate and Seclore Expand Partnership across EMEA

Tuesday 5 November, 2024

Infinigate and Seclore announce partnership across Europe, building on successful collaboration in the Middle East.

Rotkreuz, Switzerland – 5 November 2024. The [Infinigate Group](#), the leading technology platform and trusted advisor in cybersecurity, cloud, and network infrastructure, and [Seclore](#), the leading provider of data-centric cybersecurity, are extending their partnership across Europe, building on their successful collaboration in the Middle East, through Starlink, an Infinigate Group company.

Seclore, a fast-growing, data security company, focuses on protecting the data itself rather than vulnerable networks or endpoints. This approach offers organisations the ability to implement real-time changes to data access and usage, enabling security teams to respond to cyber threats as they happen.

As one of business's most precious assets, data requires robust protection from escalating cyber risk. Seclore helps prevent data theft both within your organisation and externally through advanced encryption, dynamic enterprise-level policies and granular control over your digital assets, enabling business to meet the most stringent cybersecurity regulatory compliance requirements, such as [NIS2](#), [CRA](#) and [DORA](#). Data protection is also becoming an increasing challenge in an era when AI-powered data sourcing makes it necessary to apply specific security policies to your data.

"Partnering with Infinigate marks the beginning of an exciting new chapter for Seclore," said Justin Endres, Chief Revenue Officer at Seclore. "By leveraging the expertise of Infinigate, along with our continued focus on strategic partnerships and engaging partners, we will further solidify our position as a trusted partner across Europe as the leading Data-Centric Security solution in the world today. We're thrilled to accelerate our mission of protecting the most sensitive digital assets and continue to deliver more for our partners and their customers."

The global data protection market is projected to grow from \$150.38 billion in 2024 to \$505.98 billion by 2032, with a CAGR of 16.4%*, second only to cloud security in terms of growth rate.

"We are excited about our next phase of growth with Seclore, who offer a truly innovative platform in a fundamental cybersecurity segment such as data protection," said Denis Ferrand-

Ajchenbaum, Chief Growth Officer at the Infinigate Group. "Seclore complements Infinigate's existing cybersecurity portfolio, integrating with multiple solutions including those from Symantec and Skyhigh. Infinigate channel partners across Europe will benefit from an easy to deploy, effective solution to help customers protect their data."

Infinigate will support Seclore's channel growth through complementary professional services - from technical training, market intelligence, professional marketing, and more, to enable channel partners to optimise their offerings.

About Seclore

Protecting the world's sensitive data wherever it goes. Seclore protects and controls digital assets to help enterprises close their data security gap to prevent data theft and achieve compliance. Our data-centric approach to security ensures that only authorized individuals have access to sensitive digital assets, inside and outside of their organization. Enterprises can set automated policies and enable users to control and revoke who has access, what access they have, and for how long. Learn why leading enterprises like American Express, Ford and IDFC Bank choose Seclore to protect and control their digital assets without sacrificing seamless collaboration and data sharing.
